

BRAND GUIDELINES

Clear rules for identity, typography, evidence, and digital use.

Preserve the identity. Make every rule executable.

ALIGNED DECISION

Website implementation is the primary source for structure and behaviour. Confirmed project decisions govern legal identity, publication limits, and prototype status.

OPERATIONAL EXTENSION

Typography, sizing, responsive formulas, and production checks are explicit so designers, writers, and developers can apply the system consistently.

- | | | |
|----|-------------------|--|
| 01 | Foundation | Identity, audience, positioning, personality |
| 02 | Expression | Voice, messaging, claims, publication boundaries |
| 03 | Identity | Logo, colour, typography, sizing, layout |
| 04 | Experience | UI, inquiry flow, imagery, motion, accessibility |
| 05 | Governance | Dummy data, approval, launch blockers, sources |

A legal-regulatory brand operated by a confirmed company.

CONFIRMED

Galdino & Partner is a brand operated by PT Karya Usaha Sukses, a limited liability company established in 2015 and domiciled in Kota Tangerang, Banten, Indonesia. The business registration number remains pending from official company records.

PUBLIC DESCRIPTOR

GALDINO
& PARTNER
BY KULTIVATE

OPERATOR

PT KARYA USAHA SUKSES

REGISTRATION NUMBER: PENDING VERIFICATION

Built for decision-makers navigating Indonesia.

Business leaders

01

Indonesian owners, founders, directors, and operations teams who need a clear path from activity to permit requirements.

Legal teams

02

In-house legal and compliance teams seeking structured orientation, scope clarity, and documented follow-up.

International teams

03

Investors and international companies who need English-language orientation without diluting official Indonesian terminology.

Growth situations

04

Companies establishing, expanding, regularising, or maintaining business activities in Indonesia.

Four service pillars. One ordered regulatory journey.

WEBSITE CURRENT

The website presents four primary categories: Business Establishment & Legality, Risk-Based Licensing, Compliance & Legal Advisory, and Project & Investment Licensing.

PROTOTYPE SCOPE

The 15 detailed service items shown in the high-fidelity prototype remain a prototype catalogue under these four categories. They are not separate approved claims.

Lead with permit handling and operational clarity. Legal capability supports the journey. Never promise outcomes controlled by an authority.

Calm precision. Decisive structure.

CALM

Never alarmist. Reduce noise and make the next step visible.

PRECISE

Use accurate legal and regulatory language without hiding uncertainty.

PRACTICAL

Connect every requirement to an operational decision or action.

COMMERCIALLY AWARE

Frame compliance around expansion, continuity, risk, and investment.

PREMIUM

Earn authority through restraint, hierarchy, and verified evidence.

DECISIVE

Prioritise the permit path and state what happens next.

Plain language without losing legal nuance.

USE

- we help
- map
- review
- guide
- requirements
- business activity
- risk level
- next step

AVOID

- guarantee
- fastest
- 100% approved
- best in Indonesia
- instant approval
- unsupported superlatives
- hourly-advice framing
- authority outcome promises

Message architecture: activity, problem, support, next step.

ACTIVITY

Name the business activity, entity action, project, or compliance event.

PROBLEM

Explain the classification, risk, document, authority, or sequencing issue.

SUPPORT

State how Galdino & Partner maps, prepares, coordinates, monitors, or reviews.

NEXT STEP

Invite a consultation or inquiry. Use one consistent intent across navigation and content.

BOUNDARY

State that information is general and outcomes remain subject to the relevant authority.

Required disclaimer: Information on this website is general and does not constitute legal advice for a specific matter.

Distinguish confirmed facts, pending facts, and prototype content.

CONFIRMED

- Brand display name
- PT Karya Usaha Sukses operator
- Established 2015
- Kota Tangerang, Banten
- Four primary service categories
- Indonesian and English routes

PENDING VERIFICATION

- Registration number
- Public firm phone and email
- Official office address
- Privacy and Terms copy
- Credentials and project outcomes
- Target domain purchase

PROTOTYPE ONLY

- Three named team profiles
- 15 detailed service items
- Six localized article entries
- Project and experience cards
- Statistics and client marks
- Prices and timelines

The approved red-black-gold master mark.

PROJECT-DEFINED

MASTER FILE

public/assets/gp-logo-brand.png

DIMENSIONS

600 x 413 px / RGBA

INTEGRITY

No redesign. No recolouring. The transparent PNG supplied in this package is byte-for-byte identical to the project master.

SHA-256

92c2079247e08515100b3c7861c738db9b280f591b66f2
dd6ffe3de187e012ed

Protect the mark with consistent space and scale.

OPERATIONAL EXTENSION ON EVERY SIDE

minimum sizes. They preserve the approved artwork and suit its

Digital minimum

Use at 160 px wide or larger. For smaller interfaces, request an approved simplified asset rather than cropping the master.

Print minimum

Use at 35 mm wide or larger. Always review a physical proof when printing on textured or absorbent stock.

Choose the file by background - not by convenience.

Transparent assets retain alpha. JPEG cannot carry transparency, so it is supplied only with fixed white and brand-black backgrounds. Never add a white or off-white plate behind the transparent logo.

Consistency is a trust signal.

DO NOT REDRAW

Do not recreate lettering, shapes, or proportions.

DO NOT RECOLOUR

Do not replace the red, black, or gold artwork.

DO NOT DISTORT

Do not stretch, compress, skew, or rotate.

DO NOT CROP

Do not remove part of the approved artwork.

DO NOT ADD A PLATE

Never place a white rectangle behind the transparent asset.

DO NOT USE LEGACY GREEN

The older gp-logo.png is not the approved current master.

A disciplined red-led palette.

DERIVED CONTRAST RATIOS

Black / White 19.7:1 / Primary Red / White 6.0:1 / Deep Red / White 11.8:1 / Muted / Paper 7.1:1

Red is reserved for primary actions, active states, focus, and meaningful emphasis. Gold stays secondary. Legacy forest/teal utilities remain in global.css but are not part of the approved red-led direction for new brand work.

Poppins anchors the system. Clash Grotesk adds measured display contrast.

TYPOGRAPHY UPDATE

Aa

ANCHOR / PRIMARY FAMILY

Poppins

Body, navigation, labels, forms, metadata, long-form content

DISPLAY COMPANION

Clash Grotesk

Hero, H1-H2, selected numerical or campaign emphasis only

HERO / CLASH 600

Clarity for business action.

SECTION / CLASH 600

Ordered regulatory steps.

CARD / POPPINS 600

Risk-Based Licensing

BODY / POPPINS 400

Explain regulations clearly without reducing legal nuance.

LABEL / POPPINS 600

PERMIT PROCESS

The selected pair preserves the modern tone without feeling generic.

POPPINS / SELECTED ANCHOR

Google Fonts availability, broad weight range, strong multilingual utility, and a documented history as a workhorse in web and identity systems.

CLASH GROTESK / COMPANION

Used only where display contrast is useful. It adds sharper apertures and confident large-scale rhythm without replacing Poppins as the anchor.

FONT IN USE LOGIC

Inetum pairs Poppins with PP Monument: a workhorse sans plus a more expressive grotesk. This system adapts that contrast logic with Clash Grotesk.

CONTINUITY

The prior Aptos and Segoe direction remains the fallback logic. The change is a typography refinement, not a logo, colour, voice, or architecture redesign.

A 1.25 scale gives every size a clear job.

CSS PIXELS

The samples below use a CSS-to-PDF reference of 1 px = 0.75 pt. Browser implementation must use rem and clamp values; the px labels remain the shared design handoff.

12px Aa Micro label / Poppins 600 / tracking +0.090em

31px Aa H3 / Clash 600 / tracking -0.020em

14px Aa UI label / Poppins 600 / tracking +0.010em

39px Aa H2 / Clash 600 / tracking -0.025em

16px Aa Body / Poppins 400 / tracking +0.000em

49px Aa H1 / Clash 600 / tracking -0.030em

20px Aa Lead / Poppins 400 / tracking -0.010em

61px Aa Display / Clash 600 / tracking -0.030em

25px Aa Card title / Poppins 600 / tracking -0.015em

76px Aa Hero / Clash 600 / tracking -0.035em

96PX IS THE ABSOLUTE DISPLAY CEILING. BODY, LEGAL COPY, FORMS, SERVICES, AND PROFILES NEVER DROP BELOW 16PX.

Semantic roles translate the scale into repeatable decisions.

ROLE	FONT	SIZE	LH	TRACK	MEASURE
Hero	Clash 600	48–76 px	0.96	–0.035em	10–12ch
Page H1	Clash 600	44–61 px	1.00	–0.030em	12–16ch
Section H2	Clash 600	32–49 px	1.05	–0.025em	18–24ch
H3	Clash 600	25–31 px	1.12	–0.020em	28ch
Card title	Poppins 600	20–25 px	1.18	–0.015em	24ch
Lead	Poppins 400	20 px	1.50	–0.010em	55ch
Body / legal	Poppins 400	16 px	1.65	0	60–70ch
Nav / button	Poppins 600	14–16 px	1.25	0	one line
Metadata	Poppins 400	14 px	1.55	0	45–60ch
Micro label	Poppins 600	12 px	1.30	+0.09em	short only

Exception rule: 12 px is reserved for short uppercase labels and non-critical annotations. It is never used for form values, service descriptions, profile facts, disclaimers, navigation, or article summaries.

Fluid headings. Fixed body. Predictable reading.

HERO	$\text{clamp}(3\text{rem}, 4.8\text{vw} + 0.5\text{rem}, 4.75\text{rem})$	48–76 px
H1	$\text{clamp}(2.75\text{rem}, 4\text{vw} + 0.5\text{rem}, 3.8125\text{rem})$	44–61 px
H2	$\text{clamp}(2\text{rem}, 3\text{vw} + 0.5\text{rem}, 3.0625\text{rem})$	32–49 px
H3	$\text{clamp}(1.5625\text{rem}, 1.5\text{vw} + 0.5\text{rem}, 1.9375\text{rem})$	25–31 px
BODY	1rem	16 px fixed
SMALL	0.875rem	14 px fixed
RESPONSIVE RULE	Scale the heading and its container together. Keep body measure at 60–70ch and preserve 200% zoom reflow. Use rem in code. Pixel values are design handoff references, not hardcoded body sizes.	

Line-height and spacing share one vertical rhythm.

BASE RHYTHM

16 / 26

BODY SIZE / LINE BOX IN CSS PX

The 26 px body line box is the reading unit. Paragraph gaps use 16 or 24 px. Section spacing uses 72, 88, or 112 px depending on hierarchy. Avoid arbitrary one-off gaps.

Regulatory clarity

Map the business activity and risk level.

Prepare the evidence and supporting documents.

Coordinate the filing path and next action.

Measure: 60-70ch / paragraph gap: 16-24 px / heading gap: 24-40 px

Implementation tokens keep design and code in one language.

```
:root {  
  
  --font-display: "Clash Grotesk", "Aptos Display", "Segoe UI", sans-serif;  
  
  --font-text: "Poppins", Aptos, "Segoe UI", sans-serif;  
  
  --text-body: 1rem;  
  
  --text-lead: 1.25rem;  
  
  --text-h2: clamp(2rem, 3vw + .5rem, 3.0625rem);  
  
  --text-hero: clamp(3rem, 4.8vw + .5rem, 4.75rem);  
  
  --leading-body: 1.625;  
  
  --tracking-display: -0.03em;  
  
}
```

LOAD

Self-host WOFF2. Use font-display: swap. Preload only Poppins Regular and the display weight used above the fold.

FALLBACK

Retain Aptos and Segoe UI in the stack. Test metric shift. Do not link Google Fonts from a production HTML head.

The guideline sets a migration target. It does not claim the code is already updated.

CURRENT STACK

Aptos Display / Aptos with Segoe UI and system fallbacks.

SIZE VALUES

120 font-size declarations use 73 unique values.

BELOW 16 PX

Many service, profile, form, navigation, and article strings render below the new body minimum.

WEIGHT VALUES

17 distinct font-weight values create unnecessary role fragmentation.

DISPLAY LIMIT

One 101.6 px maximum and one -0.08em tracking value exceed the new ceiling.

ACTION

Adopt semantic tokens in a future code change. This document does not modify the website.

Editorial asymmetry, measured structure, generous space.

PROJECT-DEFINED

78rem

Maximum content container

4.5–7rem

Fluid section spacing

SQUARE

Predominantly flat, square-edged components

RULES

Hierarchy through lines, type, image, and colour

NO GLOW

No glassmorphism, decorative glow, or excessive gradients

Digital behaviour should clarify state - never perform for attention.

CONTROLS

140–190 ms / cubic-bezier(.22, 1, .36, 1). Hover lift no more than 2 px; press scale 0.97.

ARROWS

Movement is capped at 3 px and communicates direction.

REVEALS

Opacity plus a 12 px translation over approximately 500–520 ms.

IMAGES

Hover scale capped at 1.02; fine pointers only.

CAROUSELS

Service rails never autoplay. Company gallery may advance every six seconds only when motion is allowed.

REDUCED MOTION

Remove non-essential movement and smooth scrolling when the preference is enabled.

A focused inquiry flow with an explicit completion state.

PUBLICATION BOUNDARY

The current phone and email are Kultivate project contacts, not approved public Galdino & Partner contacts. The target domain `galdinopartner.co.id` is not yet purchased. Privacy and Terms remain unavailable.

Imagery must feel specific, editorial, and approved.

IMAGEGEN CONCEPT – VISUAL DIRECTION ONLY – NOT COMPANY OR PROJECT EVIDENCE

OPERATIONAL EXTENSION

Compatible visual direction

Use measured document geometry, architectural linework, matte paper, controlled red fields, and restrained gold rules to express complexity becoming order.

Photography rules

Prefer official team, office, project, and permit-process photography with consent. Use natural texture, credible environments, and descriptive alt text. Avoid generic gavels, justice scales, government-looking seals, stock handshakes, and invented evidence.

Accessibility and bilingual clarity are brand behaviours.

WCAG 2.2 AA

Preserve semantics, heading order, labels, lists, and native controls.

/ID/ + /EN/

Indonesian remains default and prefixed; English receives complete equivalent content.

44 x 44 PX

Use approximately 44 px minimum interactive targets.

TERMINOLOGY

Keep official Indonesian legal terms when translation would create ambiguity; add an English explanation.

FOCUS

Use a high-contrast gold outline; never remove visible focus.

NATURAL COPY

Translations should be natural, not literal, while preserving service meaning and status.

COLOUR

Never let colour carry the only meaning.

REDUCED MOTION

Disable non-essential animation and smooth scrolling.

A restrained application system across digital and print.

OPERATIONAL EXTENSION

Application principles

- Use the approved logo master only.
- Let white, paper, or black carry the composition.
- Reserve red for decisions and action.
- Use gold as a thin secondary signal.
- Keep typography sparse and aligned to rules.
- Treat mockups as identity applications, not evidence of production materials.

CONCEPT APPLICATION – APPROVED LOGO OVERLAID WITHOUT REDESIGN

Prototype visibility never converts dummy data into company fact.

- 01** **LABEL** Mark dummy, placeholder, preview-only, and pending-verification content at its source.
- 02** **EXCLUDE** Keep dummy facts out of metadata, structured data, legal notices, and launch claims.
- 03** **VERIFY** Confirm registration, public contacts, address, credentials, privacy, terms, and domain ownership.
- 04** **APPROVE** Record business, legal, content, and asset approval before a status changes.
- 05** **REMOVE** Before launch, replace or remove every blocker that is not approved for publication.

HIGH-FIDELITY PROTOTYPE CONTENT MAY REMAIN ON STAGING. IT MUST NOT BE PRESENTED AS FINAL FACT OR SHIP UNREVIEWED.

This aligned edition extends the existing brand package.

ORIGINAL	Galdino-and-Partner-Brand-Guidelines.pdf remains unchanged	PRESERVED
