

GALDINO & PARTNER

# MASTER ALIGNMENT REPORT

## Fase 1 + Fase 2 + Website Aktual

**BASELINE**

Current website implementation is the primary structural source.  
Confirmed legal/business facts control over prototype content.  
Unimplemented Fase 2 decisions remain visible as backlog.

| Field            | Value                            |
|------------------|----------------------------------|
| Prepared for     | Galdino & Partner / Kultivate    |
| Date             | 5 Agustus 2026                   |
| Legal operator   | PT Karya Usaha Sukses            |
| Brand descriptor | Galdino & Partner by Kultivate   |
| Status           | APPROVED FOR DOCUMENT ALIGNMENT  |
| Website code     | Read-only baseline; not modified |

## 1. Executive Summary

Audit confirms that the website has moved ahead of the latest Fase 2 architecture in several areas. The documentation is therefore organized into two controlled layers: CURRENT IMPLEMENTED and PENDING/BACKLOG. Prototype data remains visible for staging and high-fidelity presentation but is never treated as final business fact.

### KEY DECISION

No existing source is deleted. Current implementation controls route and interaction documentation; confirmed legal facts control public identity; unresolved data remains explicitly gated.

## 2. Approved Source Hierarchy

| Priority | Source                   | Controls                                                                              |
|----------|--------------------------|---------------------------------------------------------------------------------------|
| 1        | Website/codebase terbaru | Implemented routes, navigation, CTA, page hierarchy, features, and current user flow. |
| 2        | Fase 2 terbaru           | Architecture and decisions; unimplemented elements remain backlog.                    |
| 3        | Fase 1                   | Discovery, confirmed business facts, user needs, and project context.                 |
| 4        | Supporting files         | Reference only; may not create new claims or expand scope without approval.           |

## 3. Confirmed Business and Brand Facts

- Galdino & Partner is a brand operated by PT Karya Usaha Sukses.
- PT Karya Usaha Sukses is a limited liability company established in 2015.
- The company is domiciled in Kota Tangerang, Banten, Indonesia.
- Approved public descriptor: Galdino & Partner by Kultivate.
- The business registration number remains pending official documentation.
- Four top-level service categories remain the approved service framework.

### CONTACT CONTROL

The phone number and email currently implemented on the website are project/Kultivate contacts, not approved public contacts for Galdino & Partner.

## 4. Current Website Baseline

The current site renders 24 localized HTML URLs across eight page types. The root redirects to /id/. RSS feeds, robots.txt, and the contact API are also implemented.

| Page type      | Current routes               | Lifecycle                   |
|----------------|------------------------------|-----------------------------|
| Home           | /id/; /en/                   | CURRENT                     |
| Profile        | /id/profile/; /en/profile/   | CURRENT                     |
| Profile Detail | 3 profiles x 2 languages     | CURRENT PROTOTYPE / noindex |
| Services       | /id/services/; /en/services/ | CURRENT                     |

| Page type       | Current routes               | Lifecycle         |
|-----------------|------------------------------|-------------------|
| Our Experiences | /id/projects/; /en/projects/ | CURRENT PROTOTYPE |
| Blog            | /id/blog/; /en/blog/         | CURRENT PREVIEW   |
| Article Detail  | 3 articles x 2 languages     | CURRENT PREVIEW   |
| Contact         | /id/contact/; /en/contact/   | CURRENT           |

## Implemented technical behavior

- Desktop and mobile navigation share Home, Profile, Services, Our Experiences, Blog, language switch, and consultation CTA.
- Contact form uses server-side validation, sanitization, honeypot, rate limiting, and Resend delivery with WhatsApp/email fallback.
- Current success feedback is inline; the approved target is a modal/pop-up Thank You without a separate page.
- RSS is available for both languages. Team detail pages are noindex, follow.
- No CMS, analytics integration, Google Sheets integration, Privacy route, Terms route, FAQ route, or service detail route was found.

## 5. Current Information Architecture

### CURRENT IMPLEMENTED

- Home
- Profile
- Profile Detail
- Services
- Our Experiences
- Blog
- Article Detail
- Contact

### PENDING/BACKLOG

- Four Service Detail pages
- FAQ
- Privacy Policy
- Terms & Disclaimer

### Merged/removed with reason

- Thank You page is merged into the approved post-submit modal.
- Standalone Process page remains merged into Home and Services.

## 6. Navigation, CTA, and Routing

| Origin         | Primary action       | Destination           | Audit status                             |
|----------------|----------------------|-----------------------|------------------------------------------|
| Home           | Jadwalkan Konsultasi | Contact               | DIPERTAHANKAN                            |
| Home           | Lihat Layanan        | Services              | DIPERBARUI from Fase 2 CTA priority      |
| Services cards | Detail/learn more    | Services hub itself   | Self-loop; detail routes not implemented |
| Profile        | Kenali tim           | Team directory anchor | CURRENT PROTOTYPE                        |

| Origin         | Primary action        | Destination                      | Audit status                  |
|----------------|-----------------------|----------------------------------|-------------------------------|
| Projects       | Consultation          | Contact                          | CURRENT; cases remain dummy   |
| Blog           | Read article          | Article Detail                   | CURRENT PREVIEW               |
| Contact submit | Submit inquiry        | Inline success -> approved modal | TARGET UPDATE NOT IMPLEMENTED |
| WhatsApp       | External conversation | wa.me                            | Contact value is provisional  |

## 7. Service Governance

The four approved categories remain the governing service architecture. The fifteen Home catalog items may appear in the prototype as navigation/content concepts but must not be treated as approved public offerings, pricing commitments, or structured-data claims.

- Pendirian & Legalitas Usaha
- Perizinan Berbasis Risiko
- Kepatuhan & Legal Advisory
- Perizinan Proyek & Investasi

## 8. Prototype and Dummy Governance

| Content                              | Allowed now                     | Launch rule                              |
|--------------------------------------|---------------------------------|------------------------------------------|
| Three team profiles                  | High-fidelity staging; noindex  | Replace/remove before launch             |
| Fifteen service items                | Prototype under four categories | Approve scope or remove before launch    |
| Six articles                         | Preview-only                    | Exclude from launch until reviewed       |
| Three experiences/testimonials/logos | Prototype                       | Replace/remove before launch             |
| Statistics and prices                | Placeholder only                | Never publish as fact without evidence   |
| Project/Kultivate contacts           | Staging fallback                | Replace with approved public GP contacts |

## 9. Inquiry and Data Flow

- Current form fields: name, email, WhatsApp, company, service, message, consent, and honeypot.
- Delivery: Resend only for the initial version.
- Google Sheets and CRM are moved to backlog.
- Current success response is inline. Approved target: modal/pop-up with Thank You message after a successful submission.
- No separate Thank You route will be documented as current or target.
- Privacy/Terms remain unavailable; no invented policy text will be produced.

## 10. Launch Blockers

| Blocker               | Current condition  | Required before launch                   |
|-----------------------|--------------------|------------------------------------------|
| Business registration | Number unavailable | Verify against official company document |

| Blocker            | Current condition                      | Required before launch                         |
|--------------------|----------------------------------------|------------------------------------------------|
| Public contact     | Project/Kultivate contact displayed    | Approve GP phone, email, WhatsApp, and address |
| Domain             | Target approved but unpurchased        | Acquire and replace example domain/canonical   |
| Privacy/Terms      | Routes and approved copy absent        | Legal review and implementation                |
| Team               | Dummy identities and concept images    | Replace/remove; review indexability            |
| Services           | 15-item catalog is prototype           | Approve or remove; prevent schema claims       |
| Articles           | Preview-only with no reviewer metadata | Legal/editorial review or exclude from launch  |
| Experience/metrics | Dummy cases and unverified numbers     | Evidence, consent, or removal                  |
| Structured data    | Provisional domain/contact data        | Publish only verified organization data        |
| Crawling           | robots allows broad crawling           | Prevent indexing of staging/prototype content  |

## 11. Change Classification

Every cross-source decision in the accompanying workbooks uses one of the required categories below. No record is deleted without a stated reason and source priority.

- DIPERTAHANKAN; DIPERBARUI; DIGABUNGKAN; DIPINDAHKAN; DIHAPUS DENGAN ALASAN.
- DATA DUMMY; PLACEHOLDER INTERNAL; MENUNGGU VERIFIKASI; TIDAK BOLEH TAYANG.
- TIDAK DITEMUKAN DI WEBSITE; DITEMUKAN DI WEBSITE TETAPI BELUM ADA DI DOKUMEN.

## 12. Deliverable Map

- Aligned Fase 1 Discovery and aligned Website Brand Blueprint.
- Updated Inventory, Grouping, Architecture, Action & Routing, and Missing Information workbooks.
- New Dummy & Placeholder Register, Change & Decision Log, and QA Checklist workbooks.
- This Master Alignment Report in DOCX and PDF form.
- No PPT/PPTX updated because no progress deck source was found.

### CODEBASE

The website codebase was used as a read-only source and was not changed during this documentation alignment.
