

BRAND GUIDELINES

A practical system for clarity, trust, and business action.

A system grounded in the project - not a redesign.

PROJECT-DEFINED

Rules directly evidenced by source code, project documentation, or the approved logo asset.

OPERATIONAL EXTENSION

New practical standards added only where they reinforce the approved direction. They never alter the master logo or invent business claims.

01	Foundation	Purpose, audience, positioning, personality
02	Expression	Voice, messaging, claim discipline
03	Identity	Logo, colour, typography, layout
04	Experience	UI, imagery, motion, accessibility
05	Governance	Approvals, placeholders, asset package

Regulatory complexity into ordered, decision-ready steps.

PROJECT-DEFINED

Use the display name Galdino & Partner. G&P is the project short name; the legal company name remains unverified. The brand is positioned as a business licensing consultant, law firm, and legal-regulatory partner in Indonesia. The firm translates regulatory complexity into ordered, decision-ready steps.

CORE PROMISE

MAP THE
REQUIREMENTS.
PREPARE THE
DOCUMENTS.
GUIDE THE
PROCESS.

NO GUARANTEES OF AUTHORITY-CONTROLLED OUTCOMES

Built for decision-makers navigating Indonesia.

Business leaders

01

Indonesian owners, founders, directors, and operations teams who need a clear path from activity to permit requirements.

Legal teams

02

In-house legal and compliance teams seeking structured orientation, scope clarity, and documented follow-up.

International teams

03

Investors and international companies who need English-language orientation without diluting official Indonesian terminology.

Growth situations

04

Companies establishing, expanding, regularising, or maintaining business activities in Indonesia.

Permit handling first. Legal capability in support.

PROJECT-DEFINED

The homepage must lead with permit handling and business operations. It must not present the firm as a generic digital agency or an hourly legal-consultation practice.

OPERATIONAL EXTENSION

Use the phrase 'Regulatory clarity for business action' as a brand essence line when a concise internal expression is needed. It is a working line, not a verified market claim.

This sequence is the brand's recurring narrative: understand the activity, identify the regulatory pathway, prepare evidence, coordinate filing, communicate progress, and support the next action.

Calm precision. Decisive structure.

CALM

Never alarmist. Reduce noise and make the next step visible.

PRECISE

Use accurate legal and regulatory language without hiding uncertainty.

PRACTICAL

Connect every requirement to an operational decision or action.

COMMERCIALLY AWARE

Frame compliance around expansion, continuity, risk, and investment.

PREMIUM

Earn authority through restraint, hierarchy, and verified evidence.

DECISIVE

Prioritise the permit path and state what happens next.

Plain language without losing legal nuance.

USE

- we help
- map
- review
- guide
- requirements
- business activity
- risk level
- next step

AVOID

- guarantee
- fastest
- 100% approved
- best in Indonesia
- instant approval
- unsupported superlatives
- hourly-advice framing
- authority outcome promises

Message architecture: activity, problem, next step.

ACTIVITY

Name the business activity, entity action, project, or compliance event.

REGULATORY PROBLEM

Explain the classification, risk, document, authority, or sequencing issue.

SUPPORT

State how Galdino & Partner maps, prepares, coordinates, monitors, or reviews.

NEXT STEP

Invite a permit-needs assessment, consultation, service review, or WhatsApp discussion.

BOUNDARY

State that information is general and outcomes remain subject to the relevant authority.

Required disclaimer: Information on this website is general and does not constitute legal advice for a specific matter.

Trust is built through evidence - never inflated metrics.

PROJECT-DEFINED

SAFE TO EXPLAIN

- Service process
- Regulatory topics
- Scope boundaries
- General next steps
- Published articles after review

VERIFY BEFORE USE

- Legal name
- Registration
- Founding year
- Credentials
- Prices and timelines
- Project outcomes

CONSENT REQUIRED

- Client identities
- Client logos
- Testimonials
- Project details
- Official photography
- Sensitive documents

The approved red-black-gold master mark.

PROJECT-DEFINED

MASTER FILE

public/assets/gp-logo-brand.png

DIMENSIONS

600 x 413 px / RGBA

INTEGRITY

No redesign. No recolouring. The transparent PNG supplied in this package is byte-for-byte identical to the project master.

SHA-256

92c2079247e08515100b3c7861c738db9b280f591b66f2dd
6ffe3de187e012ed

Protect the mark with consistent space and scale.

X OPERATIONAL EXTENSION WITH ON EVERY SIDE

zes. They preserve the approved artwork and suit its current detail level.

Digital minimum

Use at 160 px wide or larger. For smaller interfaces, request an approved simplified asset rather than cropping the master.

Print minimum

Use at 35 mm wide or larger. Always review a physical proof when printing on textured or absorbent stock.

Choose the file by background - not by convenience.

Transparent assets retain alpha. JPEG cannot carry transparency, so it is supplied only with fixed white and brand-black backgrounds. Never add a white or off-white plate behind the transparent logo.

Consistency is a trust signal.

DO NOT REDRAW

Do not recreate lettering, shapes, or proportions.

DO NOT RECOLOUR

Do not replace the red, black, or gold artwork.

DO NOT DISTORT

Do not stretch, compress, skew, or rotate.

DO NOT CROP

Do not remove part of the approved artwork.

DO NOT ADD A PLATE

Never place a white rectangle behind the transparent asset.

DO NOT USE LEGACY GREEN

The older gp-logo.png is not the approved current master.

A disciplined red-led palette.

DERIVED CONTRAST RATIOS

Black / White 19.7:1 / Primary Red / White 6.0:1 / Deep Red / White 11.8:1 / Muted / Paper 7.1:1

Red is reserved for primary actions, active states, focus, and meaningful emphasis. Gold stays secondary. Legacy forest/teal utilities remain in global.css but are not part of the approved red-led direction for new brand work.

System typography: modern, direct, and dependency-free.

PROJECT-DEFINED

Aa

DISPLAY STACK

Aptos Display / Segoe UI Variable Display / Segoe UI / system sans

Display tracking must never go below -0.04em . Hero scale: $\text{clamp}(3\text{rem}, 4.5\text{vw}, 4\text{rem})$.
Section scale: $\text{clamp}(2.25\text{rem}, 3.8\text{vw}, 3.5\text{rem})$. Body uses Aptos / Segoe UI / system sans.

HERO

Licensing clarity for business.

SECTION

Ordered, decision-ready steps.

CARD

Risk-Based Licensing

BODY

Explain regulations in plain language without minimising legal nuance.

EYEBROW

PERMIT PROCESS / 04

Editorial asymmetry, measured structure, generous space.

PROJECT-DEFINED

78rem

Maximum content container

4.5-7rem

Fluid section spacing

SQUARE

Predominantly flat, square-edged components

RULES

Hierarchy through lines, type, image, and colour

NO GLOW

No glassmorphism, decorative glow, or excessive gradients

Digital behaviour should clarify state - never perform for attention.

CONTROLS

140-190 ms / cubic-bezier(.22, 1, .36, 1). Hover lift no more than 2 px; press scale 0.97.

ARROWS & ICONS

Use the existing ArrowIcon.astro for directional controls. Movement is capped at 3 px; avoid text-glyph arrows and generic icon grids.

REVEALS

Opacity plus a 12 px translation over approximately 500-520 ms.

IMAGES

Hover scale capped at 1.02; fine pointers only.

CAROUSELS

Service rails never autoplay. Company gallery may advance every six seconds only when motion is allowed.

REDUCED MOTION

Remove non-essential movement and smooth scrolling when the preference is enabled.

Imagery must feel specific, editorial, and approved.

OPERATIONAL EXTENSION

Compatible visual direction

Use measured document geometry, architectural linework, matte paper, controlled red fields, and restrained gold rules to express complexity becoming order.

Photography rules

Prefer official team, office, project, and permit-process photography with consent. Use natural texture, credible environments, and descriptive alt text. Avoid generic gavels, justice scales, government-looking seals, stock handshakes, and invented evidence.

IMAGEGEN CONCEPT - VISUAL DIRECTION ONLY - NOT COMPANY OR PROJECT EVIDENCE

Accessibility and bilingual clarity are brand behaviours.

WCAG 2.2 AA

Preserve semantics, heading order, labels, lists, and native controls.

/ID/ + /EN/

Indonesian remains default and prefixed; English receives complete equivalent content.

44 x 44 PX

Use approximately 44 px minimum interactive targets.

TERMINOLOGY

Keep official Indonesian legal terms when translation would create ambiguity; add an English explanation.

FOCUS

Use a high-contrast gold outline; never remove visible focus.

NATURAL COPY

Translations should be natural, not literal, while preserving service meaning and status.

COLOUR

Never let colour carry the only meaning.

REDUCED MOTION

Disable non-essential animation and smooth scrolling.

A restrained application system across digital and print.

OPERATIONAL EXTENSION

Application principles

- Use the approved logo master only.
- Let white, paper, or black carry the composition.
- Reserve red for decisions and action.
- Use gold as a thin secondary signal.
- Keep typography sparse and aligned to rules.
- Treat mockups as identity applications, not evidence of production materials.

Publish only what the project can prove.

01 **SOURCE** Store editable business facts centrally in site.ts, home.ts, profile.ts, or reviewed Markdown.

02 **VERIFY** Confirm legal identity, credentials, dates, prices, outcomes, and current-law accuracy.

03 **APPROVE** Record business, legal, content, and asset approval before removing a placeholder.

04 **PUBLISH** Use consented photography, client marks, testimonials, and project evidence only.

05 **REVIEW** Keep articles current, preserve review dates, and re-check metadata and schema.

PLACEHOLDERS, MOCK DATA, CONCEPT IMAGERY, AND UNVERIFIED CLAIMS MUST NEVER BE PRESENTED AS FINAL FACT.

The supplied brand package.

PNG	White background / Black background / Transparent	3 files
WEBP	White background / Black background / Transparent	3 files
JPG	White background / Black background	2 files
PDF	English brand guideline book	1 file
VISUALS	Imagegen editorial system + stationery concept	4 files
MANIFEST	Logo source, checksum, dimensions, formats	1 file

JPEG does not support alpha transparency. The transparent PNG is an exact copy of the approved project master. Transparent WebP is lossless. White and black variants preserve artwork geometry and use #ffffff and #0b0b0c backgrounds.

Project source register.
