

STRATEGY & DECISION REPORT

Galdino & Partner

Business Model, Service Portfolio, Operating Scenarios & Website Implications

Prepared as	Business, Service Portfolio, Operational, Brand & Information Architecture analysis
Evidence rule	Project files only for facts; all ratings and recommendations are explicitly analytical
Scope	39 service families • 18 scenarios • 15 permit-type groups • website/content roadmap
Date	5 August 2026
Status	Internal decision document — not a legal classification or market forecast

RECOMMENDED DIRECTION High-Ticket Regulatory Boutique: Regulatory Readiness & Permit Roadmap + Annual Regulatory Care as core; Selected Project & Investment Permit Management only after partner and evidence gates.

CRITICAL CAVEAT No project file provides reliable prices, margins, demand volumes, case hours, or client capacity. Numeric profitability and capacity claims are therefore intentionally not made.

1. Executive Summary

The current evidence supports a narrow, system-led regulatory boutique—not a broad permit catalog. The website can keep four approved categories as an information framework, but the launch offer should be reduced to three commercial propositions.

Decision	Recommendation	Consequence
Business model	High-ticket boutique with partner execution layer	G&P owns diagnosis, scope, client experience, QA; specialists execute technical modules
Core offers	Readiness/Roadmap; Regulatory Care; selective Project PM	Basic entity/NIB/product/admin services become supporting modules
Owner model	2 hours/day as steady-state design	4 hours/day only for controlled expansion or key project gates
Team	4-5 people for launch	Do not hire 8-10 before validated utilization and unit economics
Website	11-13 realistic launch pages	Remove/hide dummy team, stats, experience, 15-service catalog, and unreviewed articles
Capacity	Stage-gated WIP cap, not a guessed client number	Measure hours, rework, partner SLA, and owner touches during pilot

Sumner: S01-S12, S14-S22. Synthesis and recommendations are analytical; commercial numbers are unavailable.

FINAL RECOMMENDATION Choose K13 — High-Ticket Boutique, operated under a 2-hour/day owner default and using K16 as its delivery layer. Launch L01/L06/L11/L14 first; gate L15 and all technical project modules behind verified partners.

2. Fakta Utama dari Seluruh File

Facts below are traceable to current/aligned project files. They are separated from analytical assumptions.

Topic	Fact	Source
Legal operator	Galdino & Partner is operated by PT Karya Usaha Sukses, founded in 2015, domiciled in Tangerang; registration number pending	S01 D-03; S02 T21; S03 T5
Approved service framework	Four categories: establishment/legal status; risk-based permits; compliance/legal advisory; project/investment permits	S02 T14; S03 T10; S05 W-008
Positioning	Permit handling first; legal capability supports the permit engagement	S03 T7
Commercial pattern	One-time projects, retainers, tender/procurement, or combinations; fees unavailable	S02 T16-T17; S05 I-022
Target	Companies, owners, legal/ops, investors dealing with establishment, expansion, regularization, or compliance in Indonesia	S02 T34-T39
Acquisition	Referral/relations, search/Google, and existing clients are checked discovery	S02 T23

Topic	Fact	Source
	channels	
Website	Current site is bilingual with 24 localized HTML URLs and eight current page types	S04; S08
Prototype	Fifteen service cards, three team profiles, stats/proof, and six article pages are not production facts	S01 D-04-D-06; S07; S10; S21
Contact/form	Current contact is project/Kultivate; form sends by Resend only and current success state is inline	S01 D-02,D-08,D-11; S17
Claim boundary	No guarantee of authority outcome, speed, or unverified proof; illegal/unethical requests are rejected	S02 T31,T58,T60; S16; S20

3. Konflik atau Ketidakkonsistenan Antarfile

Aligned decisions and current implementation take priority, except where current implementation is dummy, unsafe, legally unconfirmed, or clearly unfinished.

Topic	Older/current conflict	Priority state	Source	Resolution
Legal/brand relationship	Old discovery phrasing implies G&P under/parented by Kultivate	PT Karya Usaha Sukses operates the brand; 'by Kultivate' is a public descriptor only	S01 D-03,D-10; S02 T71; S03 T5	Use PT Karya as legal operator; do not claim Kultivate as legal parent without proof
Service breadth	Old docs/website prototype expose 15 items and broad sectors	Four approved categories; 15 items are high-fidelity prototype, not final portfolio	S01 D-05; S03 T10; S05 W-007-W-008; S10	Reduce public portfolio after business validation
Positioning	Older blueprint gives Legal Services and Licensing equal weight	Aligned blueprint is permit handling first, legal support second	S03 T7; S13; S24	Retain permit-first
Source priority	Older F2 hierarchy can prioritize discovery/plans	Aligned decision prioritizes current website, except dummy/unsafe/legal conflicts	S01 D-01; S04	Use current aligned evidence and flag prototypes
Contact	Website contains phone/email	They are project/Kultivate contacts, not confirmed public GP contacts	S01 D-02; S02 T8,T108; S07	Do not treat as company fact
Team/statistics	Website displays names, photos, stats, sectors	Team profiles and proof metrics are dummy/unproven	S01 D-04; S02 T94,T108; S07	Remove from production claims until verified
Articles	Six article files are draft:false in code	Decision status is preview-only and no launch	S01 D-06; S07; S21	Gate publishing on competent review
Inquiry success	Current form success is inline	Approved target is modal-like thank-you	S01 D-08; S04; S09	Website implementation backlog; no strategic impact
Email workflow	Older plans mention Sheets/CRM/manual combinations	Current decision: Resend only	S01 D-11; S02 T87; S17	No CRM/storage claim
Legal pages	Privacy/Terms appear in planned architecture	No approved copy/file currently exists	S01 D-09; S06; S08; S19	Required launch blockers

4. Informasi yang Belum Tersedia

These gaps are material. They prevent quantitative profit, capacity, and production-readiness claims.

Area	Missing information	Status	Decision impact
Commercial	Price, cost-to-serve, gross margin, conversion, sales cycle, demand volume, payment terms, refund/complaint history	Tidak tersedia	Blocks quantitative profitability and capacity claims
Capacity	Observed hours per case/stage, WIP, cycle time, handoffs, rework, owner touch time	Tidak tersedia	Blocks numeric client cap
Legal identity	Registration number, full public address, confirmed public phone/email/domain	Partial	Launch blocker
Capability proof	Real team, credentials, named reviewers, past cases, sectors, client consent, testimonials, logos, certifications	Tidak tersedia	Cannot publish proof or advanced services
Service design	Deliverables, exclusions, dependencies, timelines, RACI, escalation, acceptance criteria	Tidak tersedia	Cannot price, SOP, or safely market offers
Partner system	Partner list, licenses/credentials, geography, pricing, SLA, QA, backup, liability	Tidak tersedia	Blocks partner-based launch
Market validation	ICP counts, willingness to pay, competitor pricing, channel performance, keyword volume	Tidak tersedia	Scores remain qualitative
Governance	Content owner, competent legal/regulatory reviewer, update triggers and archive process	Partial	Blocks launch articles and broad SEO
Production	Privacy/Terms, robots/schema decision, final 404/noindex, analytics/CRM decision	Partial	Launch readiness

PERLU KONFIRMASI Which vertical has real team capability, partner coverage, referenceable cases, and client demand? Without this answer, project/industrial/product/health/financial sectors remain conditional.

5. Tujuan, Batasan, dan Prinsip Bisnis

The file evidence is evaluated against the current owner brief: lean team, high-ticket focus, limited owner time, no disruption to the agency, and an explicit accounting for delivery and media maintenance debt.

1. A service is not launchable merely because it appears in a file or prototype.
2. Every published service must pass commercial, operational, capability, regulatory, and content-maintenance gates.
3. Diagnosis and scope control precede execution; government outcomes are never guaranteed.
4. The 2-hour owner model is the default architecture; the 4-hour model is an expansion option, not a hidden dependency.
5. Basic/commodity services may exist as modules, bundles, or referrals without occupying the main navigation.

6. Technology/media leverage is useful only when reviewed content stays current and feeds a validated offer.

CLASSIFICATION RULE Grade A/B/C is an internal business-operational grade. It is not a legal classification and does not replace sector-specific professional review.

6. Inventarisasi Seluruh Tipe dan Layanan Perizinan

The scan produced 39 service families. Examples are retained to preserve source coverage, but broad families are not automatically approved offers.

ID	Type	Service family	Examples found	Source
L01	Audit dan pemetaan perizinan	Regulatory Readiness & Permit Roadmap	Assessment kebutuhan; peta izin; dependency map; checklist dokumen; gap map	S02 T38-T41,T50,T56; S03 T5,T9; S12 T12-13
L02	Pendirian dan legalitas badan usaha	Pendirian PT/CV + dokumen dasar + NIB sebagai paket	PT; CV; akta/dokumen korporasi; NIB dasar	S02 T14,T38; S10 home.ts; S11 pp.2-3,6
L03	Pendirian dan legalitas badan usaha	Pendirian PT PMA	PT PMA; struktur awal; NIB/OSS; koordinasi kebutuhan investasi	S02 T34,T38,T84; S10 home.ts; S11 p.3
L04	Pendirian dan legalitas badan usaha	Bentuk badan lain	PT perorangan; firma; persekutuan perdata; yayasan; koperasi; perkumpulan	S11 p.3
L05	Perubahan dan pemulihan	Perubahan data korporasi	Perubahan data perseroan; kegiatan usaha; pengurus; alamat; penyesuaian korporasi	S02 T38-T39; S10 home.ts; S11 p.3
L06	Perizinan berbasis risiko	KBLI, NIB, dan OSS-RBA mapping	Review aktivitas; pemilihan KBLI; tingkat risiko; NIB; OSS-RBA	S02 T14,T38-T40,T84; S03 T10; S10 home.ts; S21 risk-based article
L07	Perizinan berbasis risiko	NIB/OSS standalone	Penerbitan NIB sederhana; input OSS	S11 pp.2,6; S12 paras 146-159
L08	Perizinan berbasis risiko	Sertifikat Standar, Izin, dan PB UMKU terpilih	Sertifikat Standar; izin; PB UMKU; prasyarat sektoral	S03 T10; S05 I-034-I-042; S10 home.ts; S11 p.3
L09	Perizinan operasional/sektoral	Perizinan sektoral umum	Izin operasional sektor; izin pendukung kegiatan usaha	S02 T14,T38; S03 T7,T10-T11; S05 I-034-I-042
L10	Kepatuhan pasca-izin	LKPM dan pelaporan pasca-izin	LKPM; reporting calendar; status update OSS; kewajiban berkala	S02 T39,T76,T89; S10 home.ts; S11 pp.7-8
L11	Audit dan pemulihan perizinan	Permit Audit, Remediation & Regularization	Gap audit; mismatch correction; remediation plan; regularisasi	S02 T38-T41,T50; S11 pp.7-8; S12 T12-13
L12	Perubahan dan pemulihan	Perpanjangan dan pembaruan izin	Renewal; perubahan izin; update data; recovery administratif	S02 T31,T39,T80; S11 p.8
L13	Perubahan dan pemulihan	Pencabutan dan penutupan izin	Revocation; closure; de-registration support	S02 T80; S11 p.3
L14	Kepatuhan pasca-izin	Annual Regulatory Care / Compliance Retainer	Initial audit; compliance calendar; LKPM; renewal tracking; regulatory update; correspondence support	S02 T16-T17,T39,T54-T58; S03 T10-T11; S11 pp.2,7-8
L15	Perizinan proyek dan investasi	Project & Investment Permit Management	Permit dependency map; stakeholder coordination; document control; progress reporting	S02 T14,T38,T50; S03 T10-T11; S11 pp.7-8; S12 T12-13
L16	Bangunan, lokasi, dan pertanahan	KKPR dan persetujuan lokasi	KKPR; persetujuan lokasi; location conformity	S10 home.ts; S11 pp.7-8
L17	Bangunan, lokasi, dan pertanahan	Pertanahan dan land due-diligence perizinan	Status tanah; land permit dependency; supporting due diligence	S03 T11; S11 p.7

ID	Type	Service family	Examples found	Source
L18	Perizinan lingkungan	Persetujuan lingkungan	SPPL; UKL-UPL; AMDAL; environmental prerequisites	S10 home.ts; S11 pp.7-8
L19	Bangunan, lokasi, dan pertanahan	PBG dan SLF	Persetujuan Bangunan Gedung; Sertifikat Laik Fungsi	S10 home.ts; S11 pp.7-8
L20	Industri dan pabrik	Perizinan industri dan manufaktur	Industrial/manufacturing permits; project readiness; operational compliance	S10 home.ts; S11 pp.7-8
L21	Konstruksi	Construction Tender-Ready	SBUJK/SBU; TKK; SMAP; tender documents; contracts/compliance	S10 home.ts; S11 pp.5,8
L22	Perdagangan dan distribusi	Perizinan perdagangan dan distribusi	Trade/distribution permits; operational support	S10 home.ts; S11 pp.4-5
L23	Perdagangan dan distribusi	Perizinan ekspor-impor	Import/export readiness; supporting permits; distributor requirements	S11 pp.5-6
L24	Digital dan data	Digital Platform Legal-Ready	PT/NIB; PSE/TDPSE; privacy/ToS/DPA/PDP screen; OJK/BI screening	S11 pp.7-8
L25	Makanan dan produk	F&B Market-Ready package	NIB; SPP-IRT/BPOM; halal; SLHS; trademark; contracts	S11 pp.4,8
L26	Makanan dan produk	SPP-IRT standalone	SPP-IRT	S11 pp.4,6
L27	Makanan dan produk	BPOM advanced	Registrasi produk; label/formula; import/distributor changes; compliance	S11 pp.4,7-8
L28	Makanan dan produk	Sertifikasi halal standalone	Halal certification support	S11 pp.4,6
L29	Makanan dan produk	SNI dan sertifikasi produk	SNI; product certification prerequisites	S11 pp.4,6
L30	Kesehatan dan alat kesehatan	Healthcare Market Access	Clinic/facility permits; IDAK/CDAKB; product/label; inspection/audit	S11 pp.5,7-8
L31	Kuangan dan sektor khusus	OJK/BI regulated licensing	OJK/BI screening and licensing support	S11 pp.2,7
L32	Sektor khusus	Pertambangan dan energi	Mining/energy licensing and project support	S11 pp.2,7
L33	Sektor khusus	Pertanian, perikanan, dan kehutanan	Sector-specific operational/project permits	S11 p.7
L34	Sektor khusus	Transportasi dan logistik advanced	Advanced transport/logistics permits	S11 p.7
L35	Layanan legal pendukung	Merek dan HAKI	Trademark; basic IP filings	S10 home.ts; S11 pp.3-4
L36	Layanan legal pendukung	Dokumen legal dan kontrak pendukung	Agreements; corporate documents; project/commercial support	S03 T7; S11 p.3
L37	Administrasi pendukung	Administrasi pajak dasar	Basic tax registration/admin	S11 p.3
L38	Administrasi pendukung	Virtual office dan administrasi umum	Virtual office; generic admin support	S11 pp.2-3
L39	Long-tail sektoral	Perizinan UMKM/jasa lain yang tidak terkursi	Generic MSME/service permits not otherwise specified	S11 p.5; S12 paras 146-159

7. Penilaian Setiap Layanan

Each service is scored 1-5 across 30 requested criteria. Positive criteria use 5 = attractive; burden/risk criteria use 5 = heavy. The composite reverses burden/risk scores before applying weights. Scores are analytical, not market facts.

Criterion	Direction	Weight
Nilai transaksi	positive	5.5%
Potensi margin	positive	5.0%
Permintaan pasar	positive	4.5%
Kemampuan membayar	positive	4.5%
Daya tarik persaingan	positive	4.0%
Urgensi	positive	4.5%
Kompleksitas	negative	2.5%
Lama proses	negative	2.0%
Ketergantungan eksternal	negative	2.5%
Risiko perubahan regulasi	negative	2.5%
Risiko keterlambatan	negative	2.5%
Risiko komplain	negative	2.0%
Risiko reputasi	negative	2.0%
Kebutuhan ahli	negative	2.0%
Kebutuhan lapangan	negative	1.0%
Intensitas komunikasi	negative	2.0%
Kemudahan SOP	positive	4.5%
Kemudahan delegasi	positive	4.0%
Potensi automasi	positive	3.5%
Potensi mitra	positive	2.5%
Potensi repeat	positive	4.0%
Potensi cross-sell	positive	3.5%
Potensi SEO	positive	2.5%
Potensi artikel	positive	2.0%
Potensi YouTube	positive	1.5%
Potensi social	positive	1.0%
Beban maintenance konten	negative	2.0%
Kesesuaian tim kecil	positive	5.0%
Kebutuhan pemilik	negative	4.5%
Kesesuaian positioning	positive	5.5%

Sumber: Scoring assumptions are documented in the companion workbook. Commercial variables are qualitative because project files contain no reliable financial or demand data.

ID	Service	Grade	Score	Decision	Why	Source
L01	Regulatory Readiness & Permit Roadmap	A	4.00	Lean Launch	Masalah bernilai tinggi dan proses paling mudah distandardisasi tanpa menanggung seluruh eksekusi	S02 T38-T41,T50,T56; S03 T5,T9; S12 T12-13
L02	Pendirian PT/CV + dokumen dasar + NIB sebagai paket	B	3.44	Controlled Growth	Layak sebagai modul pendukung, bukan core high-ticket	S02 T14,T38; S10 home.ts; S11 pp.2-3,6
L03	Pendirian PT PMA	B	3.40	Controlled Growth	High-ticket potensial tetapi proof, SOP, dan scope belum tersedia	S02 T34,T38,T84; S10 home.ts; S11 p.3
L04	Bentuk badan lain	C	3.44	Ditunda	Tidak cocok untuk lean launch tanpa bukti volume dan margin	S11 p.3
L05	Perubahan data korporasi	B	3.27	Controlled Growth	Baik sebagai modul retainer atau project, bukan landing page utama	S02 T38-T39; S10 home.ts; S11 p.3
L06	KBLI, NIB, dan OSS-RBA mapping	A	4.00	Lean Launch	A jika berupa diagnosis high-value; C jika hanya administrasi NIB	S02 T14,T38-T40,T84; S03 T10; S10 home.ts; S21 risk-based article
L07	NIB/OSS standalone	C	3.44	Dieliminasi	Tidak memenuhi high-ticket dan leverage media tidak sebanding maintenance	S11 pp.2,6; S12 paras 146-159
L08	Sertifikat Standar, Izin, dan PB UMKU terpilih	B	3.40	Controlled Growth	Menarik secara bisnis tetapi belum layak sebagai katalog universal	S03 T10; S05 I-034-I-042; S10 home.ts; S11 p.3
L09	Perizinan sektoral umum	B	3.40	Controlled Growth	Grade B hanya sebagai daftar terkurasi; istilah payung tidak boleh menjadi janji universal	S02 T14,T38; S03 T7,T10-T11; S05 I-034-I-042
L10	LKPM dan pelaporan pasca-izin	A	3.83	Lean Launch	Core recurring module dengan leverage sistem tinggi	S02 T39,T76,T89; S10 home.ts; S11 pp.7-8
L11	Permit Audit, Remediation & Regularization	A	4.00	Lean Launch	High-ticket, scope-able, dan tidak harus menjanjikan approval	S02 T38-T41,T50; S11 pp.7-8; S12 T12-13
L12	Perpanjangan dan pembaruan izin	B	3.83	Controlled Growth	Layak sebagai modul retainer; bukan emergency service	S02 T31,T39,T80; S11 p.8
L13	Pencabutan dan penutupan izin	C	3.27	Partner-Based	Tidak cukup kuat sebagai service line publik	S02 T80; S11 p.3
L14	Annual Regulatory Care / Compliance Retainer	A	3.83	Lean Launch	Peluang terbesar yang disebut audit dan paling sesuai bisnis lean	S02 T16-T17,T39,T54-T58; S03 T10-T11; S11 pp.2,7-8
L15	Project & Investment Permit Management	B	3.00	Controlled Growth	Bukan Grade A karena beban operasional; layak selektif setelah sistem terbukti	S02 T14,T38,T50; S03 T10-T11; S11 pp.7-8; S12 T12-13
L16	KKPR dan persetujuan lokasi	B	3.00	Partner-Based	High value tetapi tidak cocok dieksekusi in-house pada lean launch	S10 home.ts; S11 pp.7-8
L17	Pertanahan dan land due-diligence perizinan	C	2.85	Partner-Based	High-ticket tetapi tidak sesuai tim kecil tanpa expert bench	S03 T11; S11 p.7
L18	Persetujuan lingkungan	B	3.00	Partner-Based	B hanya melalui partner; AMDAL kompleks dapat diperlakukan C per kasus	S10 home.ts; S11 pp.7-8
L19	PBG dan SLF	B	3.00	Partner-Based	Layak sebagai module project, tidak sebagai in-house core	S10 home.ts; S11 pp.7-8
L20	Perizinan industri dan manufaktur	B	3.00	Controlled Growth	Menarik sebagai growth vertical, bukan lean launch universal	S10 home.ts; S11 pp.7-8
L21	Construction Tender-Ready	B	2.85	Experimental	Potensial tetapi tidak ada bukti kompetensi internal	S10 home.ts; S11 pp.5,8

ID	Service	Grade	Score	Decision	Why	Source
L22	Perizinan perdagangan dan distribusi	C	3.27	Ditunda	Tidak cukup spesifik untuk high-ticket headline	S10 home.ts; S11 pp.4-5
L23	Perizinan ekspor-impor	B	3.40	Controlled Growth	B selektif; perlu vertical validation	S11 pp.5-6
L24	Digital Platform Legal-Ready	B	2.85	Experimental	Strategic adjacency kuat tetapi belum core dan proof belum ada	S11 pp.7-8
L25	F&B Market-Ready package	B	3.40	Experimental	Package lebih menarik daripada menjual komponen standalone	S11 pp.4,8
L26	SPP-IRT standalone	C	3.44	Dieliminasi	Beban operasional/konten tidak sebanding nilai	S11 pp.4,6
L27	BPOM advanced	B	2.85	Partner-Based	B melalui partner; bukan capability internal yang terbukti	S11 pp.4,7-8
L28	Sertifikasi halal standalone	C	3.44	Dieliminasi	Tidak cocok sebagai core high-ticket	S11 pp.4,6
L29	SNI dan sertifikasi produk	C	2.85	Partner-Based	Tidak ada bukti capability; conditional only	S11 pp.4,6
L30	Healthcare Market Access	C	2.85	Ditunda	Attractive economically but incompatible with current unproven capability	S11 pp.5,7-8
L31	OJK/BI regulated licensing	C	2.85	Ditunda	Do not publish before capability proof and approval	S11 pp.2,7
L32	Pertambangan dan energi	C	2.85	Ditunda	Not viable for lean launch despite transaction value	S11 pp.2,7
L33	Pertanian, perikanan, dan kehutanan	C	2.85	Ditunda	No evidence to prioritize over better-supported opportunities	S11 p.7
L34	Transportasi dan logistik advanced	C	2.85	Ditunda	Too broad and unvalidated	S11 p.7
L35	Merek dan HAKI	C	3.44	Partner-Based	Supporting module, not high-ticket core	S10 home.ts; S11 pp.3-4
L36	Dokumen legal dan kontrak pendukung	B	3.27	Partner-Based	Useful support, not a separate top-level pillar	S03 T7; S11 p.3
L37	Administrasi pajak dasar	C	3.44	Dieliminasi	No evidence of strategic advantage	S11 p.3
L38	Virtual office dan administrasi umum	C	3.44	Dieliminasi	Directly conflicts with lean high-ticket objective	S11 pp.2-3
L39	Perizinan UMKM/jasa lain yang tidak terkursi	C	3.44	Dieliminasi	Website completeness would create disproportionate operating debt	S11 p.5; S12 paras 146-159

8. Klasifikasi Grade A, B, dan C

Grade is assigned through both score and hard gates. A service with an attractive score remains B/C if proof, expertise, or operational control is missing.

GRADE A — CORE HIGH-TICKET L01 Readiness/Roadmap; L06 KBLI/OSS mapping when diagnostic; L10 LKPM/reporting module; L11 Audit/Remediation; L14 Compliance Retainer.

GRADE B — SELECTIVE GROWTH Entity/investment bundles, selected PB UMKU/sector permits, project PM, industry/construction/product packages, and supporting legal work—only with scope and partner gates.

GRADE C — CONDITIONAL / LOW PRIORITY Commodity standalone services, broad long-tail permits, unproven specialist sectors, and administrative distractions. C may be high-ticket but still operationally unsuitable.

ID	Service	Advantages	Disadvantages	Risks	Conditions
L01	Regulatory Readiness & Permit Roadmap	Scope dapat dibatasi; hasil konkret; menjadi pintu masuk cross-sell; cocok dengan positioning map-prepare-guide	Butuh judgement regulasi dan bukti kompetensi; nilai ekonominya belum tervalidasi	Kesalahan mapping dapat memicu rework dan reputational loss	Template assessment, reviewer kompeten, disclaimer otoritas, deliverable dan exclusion disetujui
L02	Pendirian PT/CV + dokumen dasar + NIB sebagai paket	Demand luas; SOP dan delegasi tinggi; mudah menjadi feeder	Persaingan dan perbandingan harga tinggi; rawan menjadi low-ticket	Scope creep, komunikasi tinggi, dan positioning turun menjadi penyedia administrasi	Hanya paket minimum bernilai jelas; tidak dijadikan headline; fee floor dan checklist
L03	Pendirian PT PMA	Target mampu membayar; cross-sell tinggi; bilingual website mendukung	Butuh keahlian, detail sektoral, dan komunikasi lebih tinggi	Salah scope investasi/KBLI; dependensi dokumen lintas negara	Lead kompeten, checklist dokumen, penerjemahan/partner bila perlu, tidak menjanjikan approval
L04	Bentuk badan lain	Menambah cakupan pencarian dan referral	Memperlebar SOP, expertise, dan konten untuk nilai transaksi yang belum terbukti	Long-tail inquiry dan kesalahan pemilihan bentuk	Tawarkan hanya setelah demand/profit dan partner tervalidasi
L05	Perubahan data korporasi	Repeat/cross-sell baik; dapat ditemplate; natural post-sale	Kasus dapat membuka isu dokumen lama	Data tidak konsisten dan dependensi notaris/otoritas	Hanya untuk klien dengan baseline document audit; scope perubahan tertulis
L06	KBLI, NIB, dan OSS-RBA mapping	Urgensi tinggi; SEO kuat; deliverable dapat distandardisasi; feeder seluruh portfolio	Standalone NIB mudah menjadi komoditas	Kesalahan mapping; perubahan regulasi; klien menganggap NIB = semua izin selesai	Dijual sebagai mapping/alignment, bukan jasa cetak NIB; reviewer dan assumptions log
L07	NIB/OSS standalone	SOP/automation tinggi dan demand luas	Low-ticket, kompetitif, komunikasi koreksi tinggi, merusak high-ticket positioning	Price shopping dan harapan kecepatan/approval	Hanya sebagai bagian paket atau retainer; tidak dipromosikan standalone
L08	Sertifikat Standar, Izin, dan PB UMKU terpilih	Urgent, natural cross-sell, dapat dipaketkan per sektor	Bervariasi menurut sektor; dependensi otoritas dan bukti teknis	Delay, complaint, regulatory change, dan salah klasifikasi	Batasi sektor; service blueprint per sektor; partner SLA; no guarantee
L09	Perizinan sektoral umum	Nilai dapat naik dengan kompleksitas; cocok sebagai upsell	Istilah terlalu luas dan tidak dapat diberi SOP tunggal	Overclaim kompetensi dan scope ambiguity	Publikasikan hanya sektor yang punya case owner, SOP, partner, dan reviewer
L10	LKPM dan pelaporan pasca-izin	Repeat, automation, kalender, dan retainer fit tinggi	Butuh monitoring regulasi dan data tepat waktu dari klien	Late filing, data quality, missed obligation	Calendar ownership, reminder cadence, RACI, data cut-off, reviewer
L11	Permit Audit, Remediation & Regularization	Masalah urgent dan bernilai tinggi; outcome berupa gap map dan action plan	Kasus lama dapat kompleks dan membutuhkan ahli tambahan	Hidden issues, disputed facts, reputational exposure	Paid diagnostic dulu; evidence register; staged proposal; partner escalation
L12	Perpanjangan dan pembaruan izin	Repeat tinggi; cocok dengan calendar dan retainer	Urgensi dapat memicu rush dan ketergantungan otoritas	Missed deadline, incomplete historical documents, complaints	Cut-off dan no-rush policy; renewal calendar; client responsibility clause
L13	Pencabutan dan penutupan izin	Cross-sell pada lifecycle akhir	Nilai/demand tidak terbukti; potensi isu pajak/ketenagakerjaan/leg	Liability tail dan incomplete closure	Case-by-case dengan legal/tax partner; exclusion jelas

ID	Service	Advantages	Disadvantages	Risks	Conditions
			al lain		
L14	Annual Regulatory Care / Compliance Retainer	Recurring revenue, high switching cost, SOP/automation, cross-sell, dan positioning kuat	Beban monitoring regulasi dan service level berkelanjutan	Missed obligations, scope creep, client data delays	Tier scope; portfolio limit; named owner; alert and review SOP; no legal guarantee
L15	Project & Investment Permit Management	High-ticket, visible outcome, portfolio/content kuat	Kompleks, panjang, partner-dependent, dan owner oversight tinggi	Delay, authority dependency, change order, blame transfer	Paid discovery; PMO scope; RACI; change control; partner contracts; realistic timeline
L16	KKPR dan persetujuan lokasi	High urgency dan cross-sell ke environment/PBG/SLF	Kunjungan/data teknis/otoritas; tidak mudah distandardisasi penuh	Location rejection, data/spatial mismatch, delays	Technical partner, area coverage, document protocol, authority disclaimer
L17	Pertanahan dan land due-diligence perizinan	Nilai transaksi dan urgency potensial tinggi	Keahlian spesifik, data lapangan, dan liability tinggi	Title disputes, incomplete records, reputational/legal risk	Eksekusi hanya partner specialist; G&P sebagai front-end/PM; opinion boundaries
L18	Persetujuan lingkungan	Urgent, high-value, cross-sell kuat	Ahli tersertifikasi, data teknis, konsultasi publik/lapangan, regulator	Delay, technical error, public/stakeholder issue	Partner kompeten; QA evidence; level izin jelas; no universal scope
L19	PBG dan SLF	High-ticket dan jelas terkait proyek	Technical drawings, inspections, local authority, field coordination	Delay, technical non-conformance, complaint	Local technical partner; site intake; exclusions; stage gates
L20	Perizinan industri dan manufaktur	High-ticket, buyer ability tinggi, portfolio dan SEO kuat	Long cycle, banyak ahli, fieldwork, dan authority dependency	Schedule/reputation exposure dan client blame	Pilih satu vertical/geography; partner bench; PMO; evidence; WIP cap
L21	Construction Tender-Ready	Urgent, commercial outcome jelas, packageable	Aturan tender/sertifikasi berubah; expert/partner dependency	Disqualification, timeline pressure, scope creep	Partner specialist; cut-off; document responsibility; pilot cases
L22	Perizinan perdagangan dan distribusi	Cross-sell ke product/import dan KBKI	Istilah luas; value dan demand tidak terukur	Long-tail scope dan regulatory variance	Hanya paket sektor tertentu setelah validation
L23	Perizinan ekspor-impor	Urgency dan ability to pay cukup; cross-sell product compliance	Dependensi komoditas, kepabeanaan, dan partner	Shipment delay, changing rules, incorrect classification	Batasi komoditas; customs/trade partner; no shipment guarantee
L24	Digital Platform Legal-Ready	Packageable; SEO/media kuat; cocok dengan agency adjacency	Perubahan regulasi dan kebutuhan legal specialist tinggi	Advice liability, privacy incident, regulated activity misclassification	Qualified counsel; clear screen vs opinion; one vertical pilot
L25	F&B Market-Ready package	Clear outcome; content/social potential tinggi; bundle menaikkan value	Banyak sub-otoritas dan volume klien dapat membebani komunikasi	Label/formula changes, inspection, partner delays	One product class pilot; BPOM/halal partners; intake checklist
L26	SPP-IRT standalone	Demand luas dan content mudah	Low-ticket, komunikasi tinggi, tidak sesuai target high-ticket	Price shopping dan volume support	Hanya melalui partner atau bundle F&B
L27	BPOM advanced	High-value dan repeat dari perubahan produk	Expertise, inspection, dossier, dan regulator dependency tinggi	Rejection/delay, technical errors, reputational exposure	BPOM specialist partner; dossier QA; defined product classes
L28	Sertifikasi halal standalone	Demand dan search potential tinggi	Standalone berisiko price competition dan heavy updates	Authority/inspection delays dan scope assumptions	Bundle atau partner only
L29	SNI dan sertifikasi produk	Nilai dapat tinggi untuk produk wajib	Laboratorium, sertifikasi, dan technical partner dependency	Test failure, delay, cost escalation	Per product class specialist; paid diagnostic
L30	Healthcare Market Access	High-ticket, urgent, buyer ability tinggi	Very high expertise, inspection, reputation, and regulatory burden	Patient/public safety, sanctions, audit failure	Dedicated qualified expert team and sector proof before publication

ID	Service	Advantages	Disadvantages	Risks	Conditions
L31	OJK/BI regulated licensing	High-ticket and buyer ability strong	Trust, specialist counsel, long process, reputational stakes	Regulatory breach and high liability	Named qualified experts, cases, governance, and insurance as relevant
L32	Pertambangan dan energi	High-ticket, high urgency, low generic competition	Network, technical experts, location, regulator, and fieldwork intensive	Severe delay/reputation/compliance exposure	Dedicated vertical team, partner bench, cases, and WIP governance
L33	Pertanian, perikanan, dan kehutanan	Potential project value	Demand, margin, capability, and partner network unvalidated	Fieldwork, regional variance, authority dependency	Only after a validated niche and specialist partner
L34	Transportasi dan logistik advanced	Potential B2B value	Technical and sector variation; no proof	Safety/reputation and regulatory change	Choose exact sub-sector and partner before offer
L35	Merek dan HAKI	Natural cross-sell and content relevance	Crowded, price-comparable, not core permit-first	Opposition/rejection and expectation mismatch	Partner or bundle only; no outcome guarantee
L36	Dokumen legal dan kontrak pendukung	Cross-sell and outcome coherence	Can pull brand back into generic law-firm scope	Unauthorized/unqualified advice, scope creep	Only contextual to permit project; qualified legal reviewer; explicit exclusions
L37	Administrasi pajak dasar	Can complete setup bundle	Low-ticket, crowded, outside strongest positioning	Scope drift and specialist dependency	Refer/partner only
L38	Virtual office dan administrasi umum	Easy cross-sell	Commodity, operational distraction, no high-ticket fit	Vendor complaints and brand dilution	Referral only; never headline
L39	Perizinan UMKM/jasa lain yang tidak terkursi	Long-tail traffic possible	Infinite catalog/content/regulatory burden and weak SOP	Overclaim, unqualified inquiries, maintenance failure	Do not offer generically; accept only if mapped to approved category and capability

9. Pengelompokan Berdasarkan Tipe Perizinan

Grouping follows the project evidence rather than forcing every example from the brief. Employment licensing was not found as a supported service family in the scanned project files.

Type	Target	Problem	Value	Complexity	Avg
Audit dan pemetaan perizinan	Decision-maker, legal/ops, investor	Ketidakjelasan izin, mismatch, dan urutan tindakan	Tinggi secara kualitatif	Sedang; judgement tinggi tetapi scope bisa dibatasi	A
Pendirian dan legalitas badan usaha	Founder, perusahaan baru, investor asing	Fondasi entitas dan data korporasi	Rendah-sedang; PT PMA lebih tinggi	Rendah-sedang	B
Perizinan berbasis risiko	Perusahaan baru, berubah, atau menuju operasi	KBLI/risk/NIB belum selaras dengan kegiatan	Sedang-tinggi jika diagnostic/bundle	Sedang	B
Perizinan operasional/sektoral	Operator sektor terpilih	NIB belum cukup untuk operasi	Tergantung sektor	Tinggi jika katalog luas	B
Kepatuhan pasca-izin	Perusahaan dengan izin dan kewajiban berkala	Monitoring, LKPM, renewal, dan perubahan regulasi	Tinggi dan berulang	Sedang; sistem intensive	A
Perubahan, perpanjangan, dan penutupan	Klien lifecycle	Status izin berubah/kedaluwarsa/ditutup	Sedang	Sedang	B
Perizinan proyek dan	Investor, developer,	Izin saling bergantung dan proyek tidak	Tinggi	Sangat tinggi	B

Type	Target	Problem	Value	Complexity	Avg
investasi	project owner	terkendali			
Bangunan, lokasi, pertanahan, lingkungan	Pabrik, gudang, developer, project owner	Site/project prerequisites	Tinggi	Sangat tinggi	B
Industri dan konstruksi	Manufacturer, factory investor, contractor	Project/tender/operation readiness	Tinggi	Tinggi-sangat tinggi	B
Perdagangan, distribusi, ekspor-impor	Trader, distributor, importer/exporter	Operational and cross-border readiness	Sedang	Sedang-tinggi	B
Makanan dan produk	Producer, importer, product owner	Market access dan product compliance	Campuran; bundle/BPOM advanced lebih tinggi	Sedang-sangat tinggi	C
Kesehatan, keuangan, dan sektor khusus	Regulated sector operators	Market/operational access	Tinggi potensial	Sangat tinggi	C
Digital dan data	Platform/startup/system operator	Regulatory and legal readiness	Sedang-tinggi potensial	Tinggi	B
Legal dan administrasi pendukung	Existing permit clients	Supporting documents/admin	Rendah-sedang	Rendah-sedang	C
Long-tail izin umum	Unsegmented inquiries	Variatif	Tidak tervalidasi	Tidak terbatas	C

Type	Expert	Core potential	Content	Operational burden	2h fit	4h fit
Audit dan pemetaan perizinan	Regulatory reviewer	Sangat tinggi	Tinggi	Sedang	Sangat sesuai	Sangat sesuai
Pendirian dan legalitas badan usaha	Legal/corporate support	Pendukung	Tinggi tetapi kompetitif	Sedang	Terbatas	Sesuai selektif
Perizinan berbasis risiko	OSS/RBA reviewer	Tinggi	Sangat tinggi	Sedang-tinggi karena perubahan	Sesuai jika dibatasi	Sesuai
Perizinan operasional/sektoral	Sector specialist	Selektif	Tinggi per vertical	Tinggi	Tidak untuk cakupan luas	Satu-dua vertical
Kepatuhan pasca-izin	Compliance lead/reviewer	Sangat tinggi	Tinggi	Maintenance regulasi tinggi	Sangat sesuai dengan SOP	Sangat sesuai/scale
Perubahan, perpanjangan, dan penutupan	Case manager + partner sesuai isu	Modul	Sedang	Sedang	Sebagai retainer	Sesuai selektif
Perizinan proyek dan investasi	PMO + multi-disciplinary partners	Growth offer	Sangat tinggi	Sangat tinggi	Partner/front-end only	Selektif
Bangunan, lokasi, pertanahan, lingkungan	Spatial, land, environment, building experts	Partner-based	Sangat tinggi	Sangat tinggi	Tidak in-house	PM selektif
Industri dan konstruksi	Industry/construction specialists	Vertical growth	Sangat tinggi	Tinggi	Partner-based	Satu vertical
Perdagangan, distribusi, ekspor-impor	Trade/customs partner	Selective	Tinggi	Tinggi	Terbatas	Satu sub-sector
Makanan dan produk	Product/halal/BPO M/SNI partners	Experimental/partner	Sangat tinggi	Sangat tinggi	Partner-only	Pilot vertical
Kesehatan, keuangan, dan	Named specialist	Ditunda	Tinggi	Sangat tinggi	Tidak sesuai	Tidak sebelum

Type	Expert	Core potential	Content	Operational burden	2h fit	4h fit
sektor khusus	teams					proof
Digital dan data	Data/privacy/sector counsel	Experimental	Sangat tinggi	Tinggi	Pilot partner	Satu vertical
Legal dan administrasi pendukung	Legal/tax/vendor partners	Tidak	Sedang	Distraction risk	Referral/bundle	Referral/bundle
Long-tail izin umum	Bervariasi	Tidak	Tinggi secara volume, buruk secara maintenance	Sangat tinggi	Tidak sesuai	Tidak sesuai

10. Skenario Pemilik 2 Jam per Hari

The 2-hour design is the preferred operating constraint. It requires paid discovery, refusal rules, delegated case ownership, and a stage-based WIP cap.

K01 — 2 Jam — Grade A Saja

Diagnostic dan recurring compliance tanpa project execution luas. **Keputusan: PILIH sebagai opsi aman.**

Offer & pasar	Tipe: Audit/mapping; OSS-RBA alignment; post-permit compliance Layanan: L01, L06, L10, L11, L14 Grade: A Target: Decision-maker dan perusahaan dengan gap/obligation nyata
Owner & tim	Owner: Maks. 2 jam/hari; Risk gate, scope exception, key consultation; bukan case chasing Tim: 4 orang — Owner; service lead; analyst; ops/client coordinator
Delivery	Partner: Reviewer/sector partner on demand Automasi: Intake, checklist, document request, status update, calendar Capacity: Angka klien belum tersedia; gunakan WIP cap berbasis time study
Beban	Kompleksitas: Rendah-sedang Risiko: Missed scope/regulatory update Komunikasi: Sedang dan terjadwal Regulasi: Sedang-tinggi
Website & media	Web: 8-10 core pages SEO: 3 focused clusters YouTube: 1 pillar format reused Social: Repurpose only
Economics pattern	Repeat: Sangat tinggi Cross-sell: Tinggi Tidak ada angka pendapatan/margin dalam file.
Trade-off	Kelebihan: Paling mudah distandardisasi dan tidak mengganggu agency Kekurangan: Revenue ceiling dan market proof belum ada
Gate	Berhasil jika: Paid diagnostic; retainer SOP; WIP cap; reviewer Tidak layak jika: Menerima project kompleks ad hoc

K02 — 2 Jam — Grade A dan B Terbatas

Core A ditambah PT PMA, selected PB UMKU, dan project PM terbatas. **Keputusan: UJI.**

Offer & pasar	Tipe: Core A + establishment/investment + selected sector Layanan: L01,L03,L06,L08,L10,L11,L14,L15 Grade: A+B Target: Corporate/investor clients
Owner & tim	Owner: Maks. 2 jam/hari; Weekly portfolio review, qualification, high-risk calls Tim: 4-5 orang —

	Owner; service lead; 2 analysts/case managers; ops
Delivery	Partner: Technical/sector partners Automasi: Core workflow + partner SLA tracking Capacity: Belum dapat diquantifikasi; batasi per stage
Beban	Kompleksitas: Sedang Risiko: Scope creep dan partner delay Komunikasi: Sedang-tinggi Regulasi: Tinggi
Website & media	Web: 10-13 pages SEO: 4 clusters YouTube: Selective Social: Selective
Economics pattern	Repeat: Tinggi Cross-sell: Sangat tinggi Tidak ada angka pendapatan/margin dalam file.
Trade-off	Kelebihan: Upside lebih besar tanpa katalog luas Kekurangan: Batas 2 jam mudah jebol jika intake lemah
Gate	Berhasil jika: Strict qualification; one B vertical; paid discovery Tidak layak jika: Lebih dari satu vertical B aktif

K03 — 2 Jam — Spesialis Satu Tipe Perizinan

Mendominasi satu problem space, direkomendasikan compliance/OSS alignment. **Keputusan: PILIH jika niche tervalidasi.**

Offer & pasar	Tipe: Satu tipe: compliance atau OSS-RBA alignment Layanan: L06,L10,L11,L14 Grade: A Target: Niche corporate yang sama
Owner & tim	Owner: Maks. 2 jam/hari; Expert signal, partner and quality governance Tim: 4 orang — Owner/principal; lead; analyst; coordinator
Delivery	Partner: Minimal; specialist reviewer Automasi: Highly templated Capacity: Belum ada data; pilot cohort kecil
Beban	Kompleksitas: Rendah Risiko: Concentration risk Komunikasi: Sedang Regulasi: Tinggi pada niche
Website & media	Web: 8-9 pages SEO: Deep topical cluster YouTube: Focused series Social: Focused series
Economics pattern	Repeat: Tinggi Cross-sell: Sedang Tidak ada angka pendapatan/margin dalam file.
Trade-off	Kelebihan: Brand jelas dan content maintenance terkendali Kekurangan: TAM dan concentration belum tervalidasi
Gate	Berhasil jika: Niche demand, willingness-to-pay, and proof Tidak layak jika: Memilih niche hanya karena SEO

K04 — 2 Jam — Model Partner-Based

G&P mengelola client front-end; partner mengeksekusi layanan teknis. **Keputusan: UJI dengan governance kuat.**

Offer & pasar	Tipe: Core A + selected complex permits Layanan: L01,L11,L14,L15-L21,L23,L27 Grade: A+B/C conditional Target: Corporate/project owners
Owner & tim	Owner: Maks. 2 jam/hari; Qualification, solution design, partner governance Tim: 4 orang + bench partner — Owner; engagement lead; PM/case manager; ops
Delivery	Partner: High Automasi: CRM/task flow, partner reporting, document control Capacity: Ditentukan partner capacity dan PM span

Beban	Kompleksitas: Sedang Risiko: Partner quality, margin leakage, blame transfer Komunikasi: Tinggi pada escalation Regulasi: High across partners
Website & media	Web: 10-12 pages; no exhaustive catalog SEO: Problem-led YouTube: Case explainer Social: Repurposed
Economics pattern	Repeat: Tinggi Cross-sell: Tinggi Tidak ada angka pendapatan/margin dalam file.
Trade-off	Kelebihan: Leverage capability without payroll Kekurangan: Control dan trust tergantung partner
Gate	Berhasil jika: Contracts, SLA, QA, backup partner, fee model Tidak layak jika: Partner dipakai tanpa evidence/RACI

2-HOUR CONCLUSION Most realistic maximum: three public offers, one B vertical at most, and no open-ended specialist catalog. Numeric client capacity cannot be asserted until time-per-stage is measured.

11. Skenario Pemilik 4 Jam per Hari

Four hours permits more sales, QA, and project steering, but it materially raises the risk of interfering with the agency. Adding service types is less attractive than increasing throughput in validated offers.

K05 — 4 Jam — Grade A Saja dengan Volume Lebih Besar

Portofolio A sama dengan volume, QA, dan content lebih besar. **Keputusan: PILIH hanya jika agency aman.**

Offer & pasar	Tipe: Audit/mapping; compliance Layanan: L01,L06,L10,L11,L14 Grade: A Target: Corporate clients
Owner & tim	Owner: Maks. 4 jam/hari; Daily exceptions, sales, QA, hiring Tim: 5-6 orang — Owner; service lead; 2 analysts; ops; client/content
Delivery	Partner: Reviewer on demand Automasi: End-to-end workflow and dashboards Capacity: Belum ada angka; capacity after time study
Beban	Kompleksitas: Sedang Risiko: Owner attention and service quality Komunikasi: Sedang Regulasi: Tinggi
Website & media	Web: 9-11 pages SEO: Expanded clusters YouTube: Regular Social: Regular repurpose
Economics pattern	Repeat: Sangat tinggi Cross-sell: Tinggi Tidak ada angka pendapatan/margin dalam file.
Trade-off	Kelebihan: Scale tanpa menambah kategori Kekurangan: Mengambil porsi besar waktu agency
Gate	Berhasil jika: Delegated sales/QA and separate P&L Tidak layak jika: Owner menjadi bottleneck

K06 — 4 Jam — Grade A dan B

Full core ditambah selected investment/project and one sector. **Keputusan: UJI setelah core stabil.**

Offer & pasar	Tipe: A + selected B Layanan: L01,L03,L06,L08,L10,L11,L14,L15,L20 Grade: A+B Target: Corporate/investor/project
Owner & tim	Owner: Maks. 4 jam/hari; Sales, QA, partner escalations, portfolio steering Tim: 6-7 orang — Owner; head of delivery; analysts; PM; ops; content/client

Delivery	Partner: Medium-high Automasi: Workflow, WIP, partner scorecard, calendar Capacity: Stage-based cap only
Beban	Kompleksitas: Tinggi Risiko: Scope/delay and capability sprawl Komunikasi: Tinggi Regulasi: Tinggi
Website & media	Web: 12-15 pages SEO: 4-5 clusters YouTube: 2 formats Social: Regular
Economics pattern	Repeat: Sangat tinggi Cross-sell: Sangat tinggi Tidak ada angka pendapatan/margin dalam file.
Trade-off	Kelebihan: Revenue and case-study upside Kekurangan: Agency interference and governance load
Gate	Berhasil jika: Separate operations lead and one B vertical Tidak layak jika: Adds second B vertical too early

K07 — 4 Jam — Multi-Tipe Perizinan Terbatas

Beberapa tipe A/B dipublikasikan bersama. **Keputusan: TUNDA.**

Offer & pasar	Tipe: Entity; OSS; compliance; project; product Layanan: L01-L29 selective Grade: A+B+C conditional Target: Broad corporate
Owner & tim	Owner: Maks. 4 jam/hari; High sales and portfolio supervision Tim: 7-8 orang — Owner; delivery head; vertical leads; PM; ops/content
Delivery	Partner: High Automasi: Multi-workflow stack Capacity: Tidak tersedia; likely owner bottleneck
Beban	Kompleksitas: Sangat tinggi Risiko: Overextension, quality variance Komunikasi: Sangat tinggi Regulasi: Sangat tinggi
Website & media	Web: 15-20 pages SEO: Many clusters YouTube: High Social: High
Economics pattern	Repeat: Tinggi Cross-sell: Sangat tinggi Tidak ada angka pendapatan/margin dalam file.
Trade-off	Kelebihan: More opportunities captured Kekurangan: Operational and content debt too high
Gate	Berhasil jika: Evidence and lead per vertical Tidak layak jika: Portfolio added before unit economics

K08 — 4 Jam — Model Konsultan dan Project Management

High-ticket diagnosis, solution design, and PM; execution outside. **Keputusan: UJI selektif.**

Offer & pasar	Tipe: Project/investment, industry, location/environment/building Layanan: L01,L11,L15-L21 Grade: A+B/C conditional Target: Project owners and investors
Owner & tim	Owner: Maks. 4 jam/hari; Principal consulting, scope, key steering Tim: 5-7 orang + partners — Owner/principal; engagement lead; PMs; analyst; ops
Delivery	Partner: Very high Automasi: Document control, RAID log, stakeholder reporting Capacity: Per project stage; no numeric evidence
Beban	Kompleksitas: Tinggi Risiko: Partner and project delay Komunikasi: Sangat tinggi Regulasi: Sangat tinggi
Website & media	Web: 10-13 pages SEO: Project problem clusters YouTube: Thought leadership Social: Selective

Economics pattern	Repeat: Sedang-tinggi Cross-sell: Sangat tinggi Tidak ada angka pendapatan/margin dalam file.
Trade-off	Kelebihan: High-ticket and clear positioning Kekurangan: Owner intensity and project volatility
Gate	Berhasil jika: Paid discovery, strong PMO, partner governance Tidak layak jika: Fixed-fee delivery without change control

4-HOUR CONCLUSION Use 4 hours as an expansion gate after a delivery lead exists. Do not make 4 hours the hidden requirement of a business advertised as lean.

12. Skenario Berdasarkan Ukuran Tim

Headcount is a structural choice, not a capacity fact. Files contain no utilization or workload data; team recommendations therefore describe roles and gates, not payroll economics.

K09 — Tim 4–5 Orang

Minimum viable boutique with broad role coverage. **Keputusan: PILIH.**

Offer & pasar	Type: Core A + one B module Layanan: L01,L06,L10,L11,L14 + one B Grade: A+B limited Target: Corporate
Owner & tim	Owner: 2-4 jam owner; Strategy, risk, key consults Tim: 4-5 orang — Owner; service lead; analyst/case manager; ops; client/content hybrid
Delivery	Partner: Selective Automasi: Templates, task board, calendar, Resend intake Capacity: Unknown; measure role capacity
Beban	Kompleksitas: Sedang Risiko: Single-point-of-failure Komunikasi: Sedang Regulasi: Manageable
Website & media	Web: 9-12 pages SEO: 3 clusters YouTube: Repurpose Social: Repurpose
Economics pattern	Repeat: Tinggi Cross-sell: Tinggi Tidak ada angka pendapatan/margin dalam file.
Trade-off	Kelebihan: Lean and quick to implement Kekurangan: Role overload and low redundancy
Gate	Berhasil jika: Cross-training, WIP, partner backup Tidak layak jika: Too many active services

K10 — Tim 6–7 Orang

Adds delivery depth and one project/sector vertical. **Keputusan: CONTROLLED GROWTH.**

Offer & pasar	Type: Core A + selected B Layanan: Core + L03/L15/L20 Grade: A+B Target: Corporate/project
Owner & tim	Owner: 2-4 jam owner; Portfolio and partner governance Tim: 6-7 orang — Owner; delivery head; 2 analysts; PM; ops; client/content
Delivery	Partner: Medium Automasi: Workflow and reporting Capacity: Unknown; only after utilization data
Beban	Kompleksitas: Tinggi Risiko: Coordination and fixed cost Komunikasi: Sedang-tinggi Regulasi: High
Website & media	Web: 12-15 pages SEO: 4 clusters YouTube: Regular Social: Regular

Economics pattern	Repeat: Sangat tinggi Cross-sell: Sangat tinggi Tidak ada angka pendapatan/margin dalam file.
Trade-off	Kelebihan: Redundancy and growth capacity Kekurangan: Higher management burden
Gate	Berhasil jika: Proven pipeline and team lead Tidak layak jika: Hiring ahead of validated demand

K11 — Tim 8–10 Orang

Multi-vertical internal organization. **Keputusan: TOLAK untuk sekarang.**

Offer & pasar	Tipe: Several permit types Layanan: A+B and specialist teams Grade: A+B+C Target: Broad corporate
Owner & tim	Owner: 4 jam+ management risk; Leadership and P&L management Tim: 8-10 orang — Owner; GM; vertical leads; PMs; analysts; ops/content
Delivery	Partner: Mixed Automasi: Advanced operating system Capacity: No data supports this size
Beban	Kompleksitas: Sangat tinggi Risiko: Fixed cost and bureaucracy Komunikasi: High Regulasi: Very high
Website & media	Web: 15-20+ pages SEO: Many clusters YouTube: High Social: High
Economics pattern	Repeat: Very high Cross-sell: Very high Tidak ada angka pendapatan/margin dalam file.
Trade-off	Kelebihan: Potential scale and redundancy Kekurangan: Conflicts with lean intent and agency focus
Gate	Berhasil jika: Validated economics, GM, multi-year pipeline Tidak layak jika: Built before product-market fit

13. Skenario Berdasarkan Tipe Perizinan

The strongest type strategies are specialist compliance, high-ticket boutique, and—later—an industrial/project vertical. Digital is a plausible adjacency but not yet evidenced capability.

K12 — Model Sangat Spesialis

One problem, one ICP, deep evidence and content. **Keputusan: PILIH niche compliance.**

Offer & pasar	Tipe: Compliance or OSS alignment Layanan: L06,L10,L11,L14 Grade: A Target: Specific regulated corporate niche
Owner & tim	Owner: 2 jam owner; Expert authority and quality Tim: 4 orang — Owner/principal; lead; analyst; ops
Delivery	Partner: Low-medium Automasi: Highly repeatable Capacity: Pilot-based
Beban	Kompleksitas: Rendah Risiko: Concentration and key-person risk Komunikasi: Sedang Regulasi: Deep
Website & media	Web: 8-9 pages SEO: One deep cluster YouTube: Series Social: Series
Economics pattern	Repeat: Tinggi Cross-sell: Sedang Tidak ada angka pendapatan/margin dalam file.
Trade-off	Kelebihan: Strong authority and low content sprawl Kekurangan: Niche choice unvalidated

Gate	Berhasil jika: Paid pilots and enough addressable demand Tidak layak jika: Niche too small or seasonal
-------------	--

K13 — Model High-Ticket Boutique

Three offers: readiness, regulatory care, selective project PM; supporting modules hidden from headline.

Keputusan: PILIH — rekomendasi utama.

Offer & pasar	Tipe: Audit/mapping; compliance; selected project/investment Layanan: L01,L06,L10,L11,L14,L15 + partner modules Grade: A + B selective Target: Corporate decision-makers, investor, legal/ops
Owner & tim	Owner: 2 jam default; 4 jam hanya expansion gate; Portfolio decisions, risk, proposal exceptions, key consults Tim: 4-5 orang — Owner; service lead; analyst/case manager; ops; client/content hybrid
Delivery	Partner: Validated technical partners Automasi: Qualification, templates, WIP, calendar, partner scorecard Capacity: No numeric cap; stage-gated WIP and owner-hours dashboard
Beban	Kompleksitas: Sedang Risiko: Proof gap, scope creep, partner quality Komunikasi: Sedang-tinggi Regulasi: Tinggi but focused
Website & media	Web: 11-13 launch pages incl. legal; 3 service pages SEO: 3 clusters YouTube: Pillar repurpose Social: Repurpose
Economics pattern	Repeat: Sangat tinggi Cross-sell: Sangat tinggi Tidak ada angka pendapatan/margin dalam file.
Trade-off	Kelebihan: Best balance of ticket, recurring, brand, and lean operations Kekurangan: Requires disciplined refusal and proof building
Gate	Berhasil jika: Launch gates, paid discovery, retainer MVP, one project vertical Tidak layak jika: 15-item catalog retained as offers

K14 — Model Perizinan Industri dan Pabrik

Vertical boutique for factory/warehouse/manufacturing projects. **Keputusan: UJI setelah partner proof.**

Offer & pasar	Tipe: Industry; KKPR; environment; PBG/SLF; operational Layanan: L15-L20 Grade: B/C conditional Target: Manufacturer, factory investor
Owner & tim	Owner: 4 jam owner; Principal sales, risk and stakeholder steering Tim: 6-7 orang + partners — Owner; industry lead; PM; analyst; document control; ops/content
Delivery	Partner: Very high Automasi: PMO and document control Capacity: Per-project only; no evidence for count
Beban	Kompleksitas: Sangat tinggi Risiko: Schedule, technical, field, authority Komunikasi: Sangat tinggi Regulasi: Sangat tinggi
Website & media	Web: 12-15 pages SEO: Powerful vertical cluster YouTube: Strong Social: Strong
Economics pattern	Repeat: Sedang Cross-sell: Sangat tinggi Tidak ada angka pendapatan/margin dalam file.
Trade-off	Kelebihan: High-ticket, portfolio, SEO potential Kekurangan: Highest interference and reputation risk
Gate	Berhasil jika: Named experts, geography, cases, partner SLAs, WIP Tidak layak jika: Public promise before proof

K15 — Model Compliance Retainer

Recurring governance service with diagnostic onboarding. **Keputusan: PILIH — paling lean/mudah.**

Offer & pasar	Tipe: Compliance; LKPM; renewal; audit/remediation Layanan: L01,L10-L14 Grade: A+B Target: Corporate with ongoing obligations
Owner & tim	Owner: 2 jam owner; Risk framework, key exceptions, quarterly review Tim: 4-5 orang — Owner; compliance lead; analyst; ops; client/content hybrid
Delivery	Partner: Reviewer on demand Automasi: Calendar, alerts, checklist, recurring reports Capacity: Portfolio cap based on obligation count, not client count
Beban	Kompleksitas: Rendah-sedang Risiko: Missed obligation and regulatory maintenance Komunikasi: Terjadwal Regulasi: Tinggi dan recurring
Website & media	Web: 9-11 pages SEO: Strong YouTube: Educational Social: Repurposed
Economics pattern	Repeat: Sangat tinggi Cross-sell: Tinggi Tidak ada angka pendapatan/margin dalam file.
Trade-off	Kelebihan: Recurring, SOP, delegation, predictable content Kekurangan: Requires trust and monitoring discipline; sales cycle unknown
Gate	Berhasil jika: MVP tier, SLA, calendar, reviewer, client data policy Tidak layak jika: Unlimited custom advisory in retainer

K17 — Digital Platform Legal-Ready

Adjacency offer for digital/agency market. **Keputusan: EKSPERIMENTAL.**

Offer & pasar	Tipe: Digital/PSE/data + setup Layanan: L24 plus L02/L06 Grade: B Target: Startup/platform
Owner & tim	Owner: 2-4 jam owner; Solution design and partner review Tim: 4-5 orang + legal partners — Owner; lead; analyst; ops; counsel partner
Delivery	Partner: High Automasi: Questionnaire, templates, issue triage Capacity: Pilot only
Beban	Kompleksitas: Tinggi Risiko: Regulatory/legal liability Komunikasi: Tinggi Regulasi: High updates
Website & media	Web: 10-12 pages SEO: Very strong YouTube: Very strong Social: Strong
Economics pattern	Repeat: Sedang-tinggi Cross-sell: Tinggi Tidak ada angka pendapatan/margin dalam file.
Trade-off	Kelebihan: Agency adjacency and content leverage Kekurangan: Not evidenced in current positioning/capability
Gate	Berhasil jika: Qualified counsel, clear scope, pilot Tidak layak jika: Markets before reviewer exists

K18 — Project Permit Complete

End-to-end land/location/environment/building/operational project permits. **Keputusan: TOLAK untuk lean launch.**

Offer & pasar	Tipe: Full project permit chain Layanan: L15-L20 Grade: B/C conditional Target: Large project owner
---------------	---

Owner & tim	Owner: 4 jam+ owner; Heavy principal involvement Tim: 7-10 orang + partners — Principal; PMO; vertical experts; document control; ops
Delivery	Partner: Very high Automasi: Complex PMIS Capacity: Not supportable from files
Beban	Kompleksitas: Sangat tinggi Risiko: Maximum schedule/reputation risk Komunikasi: Sangat tinggi Regulasi: Maximum
Website & media	Web: 15+ pages SEO: Strong but broad YouTube: High Social: High
Economics pattern	Repeat: Sedang Cross-sell: Sangat tinggi Tidak ada angka pendapatan/margin dalam file.
Trade-off	Kelebihan: Largest ticket and case-study potential Kekurangan: Contradicts lean intent and lacks proof/system
Gate	Berhasil jika: Dedicated business unit, experts, insurance/governance, proven cases Tidak layak jika: Attempted as first launch model

14. Skenario Berdasarkan Model Pengerjaan

The preferred delivery architecture separates the commercial/client-control layer from specialist execution while keeping accountability explicit.

K16 — Front-End Consultant + Eksekusi Partner

G&P owns diagnosis, proposal, client communication, QA; partners execute technical work. **Keputusan: PILIH sebagai delivery layer.**

Offer & pasar	Type: Selected complex permit types Layanan: L01,L11,L15-L21,L23,L27,L36 Grade: A+B/C conditional Target: Corporate/project
Owner & tim	Owner: 2 jam owner; Quality, commercial, partner governance Tim: 4 orang + partners — Owner; engagement lead; PM/case manager; ops
Delivery	Partner: Core to model Automasi: Intake, work orders, QA checklist, scorecard Capacity: Partner and PM span measured
Beban	Kompleksitas: Sedang Risiko: Partner failure and margin leakage Komunikasi: Tinggi Regulasi: High
Website & media	Web: 10-12 pages SEO: Problem-led, not catalog-led YouTube: Case/process Social: Repurposed
Economics pattern	Repeat: Tinggi Cross-sell: Tinggi Tidak ada angka pendapatan/margin dalam file.
Trade-off	Kelebihan: Maximum leverage and low fixed expert payroll Kekurangan: Brand owns outcomes it does not fully control
Gate	Berhasil jika: Contracts, RACI, evidence, backup, client disclosure Tidak layak jika: Unvetted partner or informal handoff

Operating boundary map

G&P owns	Shared / governed	Partner owns
Qualification; paid diagnosis; scope; proposal; client communication; document	Work plan; dependencies; status; issue escalation; acceptance evidence; change	Technical execution; fieldwork; specialist submissions/opinions; sector-specific

G&P owns	Shared / governed	Partner owns
control; QA; decision log	control	compliance

Sumber: Analytical operating model built from S02 process/claim boundaries, S03 positioning, S11 partner-heavy opportunities, and S12 process requirements.

15. Matriks Perbandingan Seluruh Skenario

Scenario ratings use 1-5, where 5 is favorable. Risk, complexity, content burden, maintenance, and partner dependence are expressed as favorable inverse scores. Full 16-criterion formula and input cells are in the workbook.

ID	Scenario	R ev	M ar	Ow ner	Team	Lo w Cx	Low Risk	S O P	D el	Au to	Rep eat	SE O	Age ncy	Sc ale	Fina l	Decision
K 1 5	Model Compliance Retainer	4	5	5	4-5 orang	5	4	5	5	5	5	5	5	5	4.59	PILIH — paling lean/mudah
K 0 1	2 Jam — Grade A Saja	3	4	5	4 orang	5	4	5	4	5	5	4	5	4	4.44	PILIH sebagai opsi aman
K 1 2	Model Sangat Spesialis	3	5	5	4 orang	5	4	5	4	4	5	5	5	3	4.40	PILIH niche compliance
K 0 5	4 Jam — Grade A Saja dengan Volume Lebih Besar	4	4	5	5-6 orang	4	4	5	5	5	5	4	3	5	4.33	PILIH hanya jika agency aman
K 0 3	2 Jam — Spesialis Satu Tipe Perizinan	3	4	5	4 orang	5	4	5	4	4	4	5	5	3	4.25	PILIH jika niche tervalidasi
K 1 6	Front-End Consultant + Eksekusi Partner	5	4	5	4 orang + partners	4	3	4	5	4	4	4	5	5	4.23	PILIH sebagai delivery layer
K 1 3	Model High-Ticket Boutique	5	5	4	4-5 orang	4	3	4	4	4	5	5	4	4	4.20	PILIH — rekomendasi utama
K 0 4	2 Jam — Model Partner-Based	4	4	5	4 orang + bench partner	4	3	4	5	4	4	4	5	5	4.13	UJI dengan governance kuat
K 0 9	Tim 4–5 Orang	4	4	4	4-5 orang	4	3	5	4	4	4	4	5	4	4.04	PILIH
K 1 0	Tim 6–7 Orang	5	4	4	6-7 orang	3	3	4	5	4	5	5	3	5	3.97	CONTROLLED GROWTH
K 0 2	2 Jam — Grade A dan B Terbatas	4	4	4	4-5 orang	4	3	4	4	4	5	5	4	4	3.93	UJI
K 0 6	4 Jam — Grade A dan B	5	4	4	6-7 orang	3	3	4	4	4	5	5	3	5	3.90	UJI setelah core stabil
K 0 8	4 Jam — Model Konsultan dan Project Management	5	4	3	5-7 orang + partners	3	3	3	3	3	4	4	3	4	3.46	UJI selektif

ID	Scenario	R ev	M ar	Ow ner	Team	Lo w Cx	Low Risk	S O P	D el	Au to	Rep eat	SE O	Age ncy	Sc ale	Fina l	Decision
K 1 1	Tim 8–10 Orang	5	3	3	8-10 orang	2	2	4	5	4	5	5	1	5	3.3 8	TOLAK untuk sekarang
K 1 7	Digital Platform Legal-Ready	4	4	3	4-5 orang + legal partners	3	2	3	3	3	4	5	3	4	3.2 6	EKSPERIMEN TAL
K 1 4	Model Perizinan Industri dan Pabrik	5	5	3	6-7 orang + partners	2	2	3	3	2	4	5	2	3	3.1 0	UJI setelah partner proof
K 0 7	4 Jam — Multi-Tipe Perizinan Terbatas	5	3	3	7-8 orang	2	2	3	3	3	4	5	2	4	3.0 5	TUNDA
K 1 8	Project Permit Complete	5	4	2	7-10 orang + partners	1	1	2	2	1	3	5	1	2	2.3 2	TOLAK untuk lean launch

INTERPRETATION A high score is not a go-live approval. K15 and K01 score well because they are narrow and systemizable; K13 is selected as the best balance because it combines recurring core with a controlled high-ticket growth path.

16. Analisis berdasarkan Dalio, Kroc, Naval, dan Hormozi

The names below are analytical lenses only. No quote or personal endorsement is attributed to them.

K01 — A only

Dalio lens	Dalio: likes explicit scope/risk; criticizes missing unit data; add decision log.
Kroc lens	Kroc: likes repeatable workflow; add QA standard.
Naval lens	Naval: likes templates/media/automation; ensure diagnosis is not owner-only.
Hormozi lens	Hormozi: likes urgent mismatch/compliance problem; strengthen deliverable and proof.

K04/K16 — Partner-based

Dalio lens	Dalio: likes transparent capability boundary; criticizes counterparty risk; add scorecard/backups.
Kroc lens	Kroc: criticizes inconsistent partner execution; standardize work orders and acceptance.
Naval lens	Naval: likes leverage without payroll; protect brand through systems.
Hormozi lens	Hormozi: likes broad outcome access; package around one clear result, not a vendor marketplace.

K13 — High-ticket boutique

Dalio lens	Dalio: likes balanced risk gates; requires real economics and kill criteria.
Kroc lens	Kroc: likes three-offer system; requires service blueprints.
Naval lens	Naval: likes media + systems + partner leverage; remove manual status chasing.
Hormozi lens	Hormozi: likes high-value corporate problems; make paid diagnostic and outcome clarity strong.

K14 — Industry/factory

Dalio lens	Dalio: criticizes tail risk and unknown proof; stage-gate every project.
Kroc lens	Kroc: difficult to replicate across sites; pick one geography/vertical.
Naval lens	Naval: leverage is weak without PMO and partners; media can compound authority.
Hormozi lens	Hormozi: likes costly urgent problems and able buyers; offer risk-reduction, not permit guarantee.

K15 — Compliance retainer

Dalio lens	Dalio: likes continuous monitoring; add obligation register and incident review.
Kroc lens	Kroc: strongest recurring SOP candidate; tier service and train backups.
Naval lens	Naval: strongest software/calendar/media leverage; automate reminders and reporting.
Hormozi lens	Hormozi: strengthen perceived value with avoided disruption, clarity, and response boundaries.

K18 — Complete project chain

Dalio lens	Dalio: rejects uncontrolled unknowns; needs dedicated risk system.
Kroc lens	Kroc: rejects early complexity and low replicability.
Naval lens	Naval: too labor/coordination heavy before tooling and bench depth.
Hormozi lens	Hormozi: value can be high, but delivery uncertainty weakens a reliable offer.

17. Layanan yang Dipilih, Diuji, Dimitrakan, Ditunda, dan Dieliminasi

Portfolio status is a commercial-operational decision. 'Eliminated' primarily means removed from public standalone offers; it may still be referred or bundled when appropriate.

Bucket	Services	Decision rule
Lean Launch	L01 Regulatory Readiness & Permit Roadmap; L06 KBLI, NIB, dan OSS-RBA mapping; L10 LKPM dan pelaporan pasca-izin; L11 Permit Audit, Remediation & Regularization; L14 Annual Regulatory	See service-level gate and source in Sections

Bucket	Services	Decision rule
	Care / Compliance Retainer	7-8 / workbook
Controlled Growth	L02 Pendirian PT/CV + dokumen dasar + NIB sebagai paket; L03 Pendirian PT PMA; L05 Perubahan data korporasi; L08 Sertifikat Standar, Izin, dan PB UMKU terpilih; L09 Perizinan sektoral umum; L12 Perpanjangan dan pembaruan izin; L15 Project & Investment Permit Management; L20 Perizinan industri dan manufaktur; L23 Perizinan ekspor-impor	See service-level gate and source in Sections 7-8 / workbook
Partner-Based	L13 Pencabutan dan penutupan izin; L16 KKPR dan persetujuan lokasi; L17 Pertanahan dan land due-diligence perizinan; L18 Persetujuan lingkungan; L19 PBG dan SLF; L27 BPOM advanced; L29 SNI dan sertifikasi produk; L35 Merek dan HAKI; L36 Dokumen legal dan kontrak pendukung	See service-level gate and source in Sections 7-8 / workbook
Experimental	L21 Construction Tender-Ready; L24 Digital Platform Legal-Ready; L25 F&B Market-Ready package	See service-level gate and source in Sections 7-8 / workbook
Ditunda	L04 Bentuk badan lain; L22 Perizinan perdagangan dan distribusi; L30 Healthcare Market Access; L31 OJK/BI regulated licensing; L32 Pertambangan dan energi; L33 Pertanian, perikanan, dan kehutanan; L34 Transportasi dan logistik advanced	See service-level gate and source in Sections 7-8 / workbook
Dieliminasi	L07 NIB/OSS standalone; L26 SPP-IRT standalone; L28 Sertifikasi halal standalone; L37 Administrasi pajak dasar; L38 Virtual office dan administrasi umum; L39 Perizinan UMKM/jasa lain yang tidak terkurasi	See service-level gate and source in Sections 7-8 / workbook

CHALLENGE TO CURRENT PROTOTYPE Do not retain L02/L07/L26/L28/L35/L37/L38/L39 as standalone public offers merely to look complete. Their content and inquiry debt is disproportionate to the current high-ticket strategy.

18. Struktur Tim Lean untuk Skenario Utama

The launch team should own the client and control system, not attempt to internalize every sector expert.

Role	Responsibilities	Boundary	Launch model
Owner / Principal	Portfolio, risk, positioning, proposal exceptions, key consultations, partner governance	No routine follow-up or document chasing	~2 hours/day design cap
Service / Engagement Lead	Qualification, scope, service quality, daily decisions, escalation	Case outcome and owner protection	Full-time role
Regulatory Analyst / Case Manager	Mapping, research, checklist, submission coordination, evidence log	Assigned portfolio	1 role at launch; add by measured WIP
Operations / Document Coordinator	Intake, documents, task stages, updates, renewal calendar, billing admin	Process integrity	Full-time or strong hybrid
Client & Content Operations	CRM-like tracking, scheduled updates, content production/reuse, bilingual coordination	No legal approval	Hybrid/shared with Kultivate initially
External reviewer/partner bench	Sector expertise, technical work, field visits, legal review	Own technical work under contract/RACI	On demand; validated before sale

OWNER-TIME RULE If owner time exceeds the cap for two consecutive review cycles, freeze new B/C work, diagnose the bottleneck, and delegate or remove the triggering service before accepting more.

19. Risiko dan Mitigasi

The main risk is not lack of service breadth; it is promising more breadth than the evidence and operating system can support.

Risk	Severity	Why it matters	Mitigation	Owner
Over-broad portfolio	High	Every service creates sales, delivery, regulation, and content debt	Three public offers; one B vertical; quarterly portfolio kill/keep review	Owner
Unverified capability	Critical	Advanced sectors are opportunity statements, not proof	No public offer before named expert, scope, SOP, and case/partner evidence	Owner + service lead
Authority delay/blame	High	Outcomes depend on government and external parties	No guarantee; dependency log; realistic estimate; client responsibility; staged updates	Engagement lead
Partner failure	High	Front-end brand absorbs execution failure	Qualification, contract, RACI, SLA, QA, backup partner, scorecard	Owner + PM
Owner bottleneck	High	Consulting/project escalation can exceed 2 hours/day	Decision rights; office hours; paid discovery; escalation thresholds; delegated service lead	Owner
Content/regulatory drift	High	Bilingual service and article content doubles review load	Core-page-first; reviewer; update triggers; source/effective-date log; archive stale content	Content owner + reviewer
Dummy leakage	Critical	Prototype team/stats/services/articles may be mistaken as fact	Production gate, placeholder register, noindex/preview separation, metadata/schema audit	Project lead
Retainer scope creep	High	Unlimited advisory destroys margin and owner time	Tiered inclusions; ticket categories; fair-use; exclusions; change order	Service lead
Sensitive data intake	High	Current form should not receive confidential documents	Minimal form; secure follow-up channel; privacy notice; no attachment at first touch	Ops + legal reviewer

20. Implikasi terhadap Website

The information architecture must follow: business model → selected scenario → permit types → priority services → target → operating process → content → pages. The current prototype sequence is reversed because it exposes a broad catalog before commercial validation.

Recommended hierarchy

URL	Page	Decision	Purpose/content	CTA	Relationship
/	Home	Keep/Update	Three-offer proposition, target problems, process, proof status, CTA	Assess Your Permit Needs	All core pages
/services	Services	Keep/Restructure	Three core offers plus supporting modules; remove 15-item universal catalog	Start Assessment	Three service pages
/services/regulatory-readiness	Regulatory Readiness & Permit Roadmap	Create	Problem, fit, deliverable, process, exclusions, evidence, CTA	Request Readiness Assessment	Compliance and project pages
/services/regulatory-care	Annual Regulatory Care	Create	Audit onboarding, calendar, LKPM/renewal modules, SLA boundaries	Discuss Regulatory Care	Readiness and insights
/services/project-permit-management	Selected Project & Investment Permit Management	Create after partner gate	Paid discovery, PM scope, selected modules, dependencies, partner disclosure	Discuss a Project	Readiness and profile
/profile	Profile	Keep/Update	PT Karya operator, 2015, Tangerang; real responsible people only	Meet the Team / Contact	Services and contact
/how-we-work	How We Work	Merge initially	Assess-map-prepare-coordinate-monitor-follow-up; can be a Home/Services section	Start Assessment	Services
/experiences	Experiences	Hide until proof	Only real, consented, redacted cases	Discuss Similar Need	Relevant service
/insights	Insights	Keep preview; launch after review	Three focused clusters; bilingual governance	Read Related Service	Service pages
/contact	Contact / Assessment	Keep/Update	Qualified intake, no sensitive uploads, Resend flow, privacy notice	Submit Assessment	Thank-you modal
/privacy	Privacy Policy	Create before launch	Controller/operator, Resend, retention, rights, contact	—	Contact/form
/terms	Terms of Use	Create before launch	Website use, no advice/guarantee, IP, links, contact	—	Footer
/faq	FAQ	Defer or embed	Only repeated verified questions; avoid generic filler	Start Assessment	Services/contact

NAVIGATION Launch header: Home • Services • Profile • Insights • Contact/Assessment. Experiences stays hidden until real consented proof exists. FAQ is embedded or deferred until repeated questions exist.

21. Strategi SEO, YouTube, dan Social Media

Media should compound a validated service, not create a second full-time business. Every bilingual page doubles review and update load.

Cluster	Theme	Intent	Article priority	YouTube	Social	Maintenance
Cluster 1	Regulatory readiness / KBLI / OSS-RBA	Commercial + informational	What NIB does not complete; KBLI mismatch; permit dependency map Existing asset: Review existing risk-based article	One explainer video from pillar	Short checklist/carousel	High update sensitivity
Cluster 2	Post-permit compliance	Commercial + informational	LKPM, renewal calendar, obligations after NIB, audit findings Existing asset: Review existing after-NIB article	Compliance calendar walkthrough	Deadline/checklist snippets	Highest recurring relevance; reviewer required
Cluster 3	Project and investment permits	Commercial + thought leadership	Expansion legality checklist; KKPR-environment-PBG-SLF dependency; paid discovery Existing asset: Review existing expansion checklist	Project dependency map	Project-risk series	Publish only selected modules/partner proof

- Review the three existing Indonesian/English topic pairs before launch; source freshness and competent reviewer are mandatory.
- Use one reviewed pillar article as the source for one video and several short-form derivatives; do not research each channel independently.
- Publish commercial service pages before expanding informational volume; route every piece to one relevant assessment CTA.
- Do not create metadata or structured data from dummy team, statistics, sectors, experience, or 15-service prototype content.

22. Roadmap Implementasi Bertahap

The roadmap uses evidence gates instead of invented calendar dates. Expansion is conditional on operating data, not enthusiasm.

Gate	Actions	Output	Exit criterion
Gate 0 — Evidence	Confirm operator details; choose 3 offers; define deliverables/exclusions; appoint reviewer; remove dummy launch content	Approved service one-pagers, legal facts, proof register, no-launch list	No unresolved critical legal/dummy blocker
Gate 1 — Operable MVP	Build intake, qualification, SOP, templates, WIP board, update cadence, retainer calendar, partner due diligence	One end-to-end dry run per offer	Owner touchpoints and handoffs measured
Gate 2 — Controlled Pilot	Sell paid diagnostic; onboard small pilot; collect time/rework/client feedback; test one partner-led project	Unit-economics and capacity dataset	No critical QA miss; owner time within cap
Gate 3 — Website Launch	Publish only validated pages; legal pages; real team/proof; reviewed bilingual content; production QA	11-13 realistic pages	No dummy/meta/schema leakage; CTA route works
Gate 4 — Controlled Growth	Add one B vertical after pass criteria; expand content only around converted demand	One new vertical at a time	Pipeline, margin, partner score, content reviewer capacity pass
Gate 5 — Scale or Kill	Quarterly keep/partner/pause/eliminate review; add staff only after repeatable utilization	Portfolio decision log	Service survives commercial, operational, and content-debt

Gate	Actions	Output	Exit criterion
			thresholds

Decision tree

START

```

|
|-- Apakah scope, deliverable, exclusion, reviewer, dan bukti tersedia?
|   |-- Tidak -> jangan publikasikan; hanya riset/partner referral
|   |-- Ya
|
|-- Dapatkah pekerjaan berjalan tanpa >2 jam/hari keterlibatan pemilik?
|   |-- Ya -> kandidat Core A
|   |-- Tidak -> apakah partner + PMO menurunkan owner load?
|       |-- Ya -> B selective/partner-based
|       |-- Tidak -> tunda/eliminasi
|
|-- Apakah nilai bisnis menutup delivery + content/regulatory debt?
|   |-- Ya -> pilot, ukur, lalu publish
|   |-- Tidak/unknown -> jangan jadi headline; bundle/referral only

```

23. Tiga Rekomendasi Skenario Terbaik

The three options below represent different risk/return envelopes; they are not interchangeable.

Option	Best for	Strength	Main risk	Decision
1 — K15 Compliance Retainer	Safest operating model	Recurring, SOP/automation, low catalog burden	Proof/trust, reviewer, scope creep	Choose if market validation confirms willingness to retain
2 — K13 High-Ticket Boutique	Best overall balance	Readiness + recurring care + selective project upside	Discipline and partner governance	Recommended primary
3 — K14 Industry & Factory	Highest project/portfolio upside	High-value visible problem and strong SEO	Highest delay/field/expert risk	Pilot only after partner/case evidence

Requested lens	Best choice	Reason
Paling aman	K01 — 2 Jam, Grade A Saja	Scope kecil, risiko dapat dibatasi, dan tidak memerlukan broad sector execution
Paling menguntungkan secara potensial	K14 — Industri dan Pabrik	Nilai proyek potensial tinggi, tetapi belum layak tanpa partner/proof; profit belum dapat dihitung
Paling lean	K15 — Compliance Retainer	Recurring, calendar-based, SOP/automation tinggi
Paling mudah dikelola	K03/K12 — Satu niche compliance/OSS alignment	Sedikit workflow dan content cluster
Paling kuat untuk SEO/portofolio	K14 — Industri/Pabrik + K15 Compliance	Topical depth dan case visibility tinggi, tetapi maintenance lebih berat

Requested lens	Best choice	Reason
Paling seimbang	K13 — High-Ticket Boutique	Tiga offer: readiness, regulatory care, selective project PM; partner layer untuk teknis

24. Satu Rekomendasi Final yang Paling Sesuai

Choose K13 — High-Ticket Regulatory Boutique, operated under a 2-hour/day default and using K16 as the delivery layer. It is the smallest portfolio that still combines high-value projects, recurring revenue logic, proof-building, and media leverage.

Launch first	L01 Regulatory Readiness & Permit Roadmap; L06 KBLI/OSS alignment as diagnostic; L11 Permit Audit/Remediation; L14 Regulatory Care with L10/L12 modules.
Growth offer	L15 Selected Project & Investment Permit Management only after paid discovery and partner gate; choose one vertical, not all sectors.
Do not offer yet	Direct healthcare, OJK/BI, mining/energy, full land/environment/building chain, broad long-tail permits, and commodity standalone PT/CV/NIB/HAKI/halal/admin.
Team	4-5: owner/principal, service lead, analyst/case manager, ops/document coordinator, client/content hybrid; external reviewers/technical partners.
Owner limit	2 hours/day steady state. Use 4 hours only for a time-boxed expansion gate after a service lead owns daily delivery.
Client limit	No defensible numeric count exists. Set caps by active stage, obligation count, partner capacity, analyst hours, rework, and owner touch time; do not onboard beyond measured WIP.
Expansion sequence	Evidence → operable MVP → small pilot → production website → one B vertical → scale/kill review.
Add-service gate	Real demand and ability-to-pay signal; positive unit economics; approved scope/SOP; named reviewer/partner; owner time remains within cap; content reviewer capacity available.

WHY THIS IS THE RECOMMENDATION It preserves the aligned permit-first brand and four-category information framework while refusing to convert every prototype item into an operational promise. It creates a recurring core and a controlled route to high-ticket project work.

25. Daftar Perubahan yang Perlu Diterapkan pada File Proyek

This report does not modify any source file or code. The following is the recommended future change set after business approval.

File/system	Recommended change	Timing/status
Fase 1 Discovery	Update service priority from four broad categories to three offers + supporting modules; record owner-time and refusal rules	After business approval

File/system	Recommended change	Timing/status
Website Brand Blueprint	Retain permit-first; replace broad scope examples with approved offer architecture and partner disclosure	After scope approval
Inventory workbook	Mark each service with portfolio bucket, grade, offer/module status, proof gate, reviewer, and maintenance owner	Immediate documentation
Grouping/Architecture	Create three service-detail routes; merge How We Work initially; hide Experiences; add Privacy/Terms	Before implementation
Action & Routing	Remove Services self-loop; route every CTA to specific assessment intent; keep Resend-only flow	Before implementation
Dummy register	Add business-status decision for 15 service items; production-block team/stats/articles/metadata	Immediate
Website data/code	Only after approval: replace 15-card catalog, hide dummy proof, update navigation/routes, modal thank-you, legal pages	Not executed in this task
Content files	Review three topic pairs; attach source/effective date/reviewer; publish only mapped clusters	Before launch
Decision log	Record chosen scenario, services killed/bundled/partnered, capacity method, and expansion gates	At approval

Appendix B — Interpretation Legend

Label	Meaning
FAKTA	Directly stated or implemented in project files; source shown.
ASUMSI ANALISIS	A reasoned score or operating interpretation created for comparison; not a market fact.
REKOMENDASI	A proposed decision with conditions and consequences.
BELUM TERSEDIA	The project files do not provide the information.
PERLU KONFIRMASI	A decision or evidence item must be approved before use.
Grade A/B/C	Internal business-operational classification; not legal classification.
